Divided into six sections, the book begins with an introduction to the types, basic principles, and equipment for minimally invasive surgery. Each of the remaining sections covers operative procedures for different sections of the gastrointestinal system: oesophagus, stomach, and small intestine; colon, rectum, and anal canal; liver, biliary tract, pancreas, and spleen; bariatrics; and metabolic surgery. Abdominal wall hernia. Each chapter provides step-by-step detail on a different procedure, assisted by illustrative figures and useful tables.
