

the Japan Sea coast, was a town of 5,000 in 1580. It grew to 120,000 in 1710. Nagoya, a small town in the early seventeenth century, had become a regional center of 64,000 residents by 1692. Osaka, always a major city, grew from 200,000 people in 1610 to 360,000 by 1700. It hit a peak of half a million by the late eighteenth century.

Growth was good for the economy in general. It affected different classes differently, however. In particular, merchants benefited from the increase in trade, markets, and urbanization. Samurai suffered from those same phenomena. Why did the samurai lose out? First, samurai were paid in fixed stipends, disbursed in rice. These stipends were based on an individual's rank and office and did not increase at a pace equal to the rise in prices. Second, with the growth of the market and monetization of the economy, samurai had to trade their rice stipends for cash. This process was controlled by merchants in Edo and Osaka. It put samurai at the mercy of both the unstable market price for rice and the greed of merchant moneychangers. Finally, samurai were forbidden by law from engaging in farming or commerce, which might have afforded them some economic relief. All of these factors made it almost impossible for samurai to benefit from the growth occurring in the economy. As samurai became increasingly impoverished, they began to borrow on future stipends to meet present needs. Thus they put themselves in debt to merchant lenders. Having samurai at their mercy not only earned the merchants a measure of profit, it also gave them significant symbolic leverage over their samurai superiors. For the samurai, being indebted to lowly merchants was extremely galling. Many low-ranking samurai whose stipends gave them barely enough to get by felt they had to scrimp and save while merchants prospered. Matters were made worse by the fact that samurai had to keep up appearances. Protocol deemed that they dress properly, live in good style, and engage in the social activities (which involved expensive gift-giving) that were required of them, but were increasingly beyond their economic means.

Tokugawa authorities were aware of the problems facing samurai. They repeatedly tried to shore up the political and moral order by elaborating on the unique role of samurai as moral exemplars and scholar/administrators. By definition, commoners could not fulfill those roles. Through the Kyōhō Reforms of the early eighteenth century and the Kansei Reforms at the turn of the nineteenth century, the shogunate enacted measures aimed at stabilizing and strengthening the economic and political status of the samurai. But the authorities' reassertion of proper political order could not change reality. Neither shogun nor *daimyō* could offer much practical help to financially strapped samurai. More broad-minded thinkers such as the philosopher Ogyū Sorai (1666-1728) proposed radical reforms. One such reform was returning the samurai to the land so they could farm. Another was overhauling the office and rank system so that lower-ranking "men of talent" could rise to positions of power. These men often languished in idleness while less deserving sons of high-ranking families inherited their fathers' positions. In the end, economic growth in the Tokugawa period favored commoners over the elite.

The Emergence of Commoner Culture

While they were not shy about commenting wryly on the state of society, urban commoners were not political activists. Peasant protests did break out in the eighteenth century, largely due to authorities' failure to provide relief during times of crop failure and food shortage. But the new urban bourgeoisie did not attempt to overthrow the warrior government. Rather,

Lloyd's Register Technical Association Session 1973-1974 Lloyd's Register Foundation, 1973-01-01 The Lloyd's Register Technical Association LRTA was established in 1920 with the primary objective of sharing technical expertise and knowledge within Lloyd's Register. Publications have consistently been released on a yearly basis with a brief interruption between 1938 and 1946. These publications serve as a key reference point for best practices and were initially reserved for internal use to maximise LR's competitive advantage. Today the LRTA takes a fresh approach focusing on collaboration by combining professional expertise from across LRF Group to ensure a frequent output of fresh perspectives and relevant content. The LRTA has evolved into a Group-wide initiative that identifies, captures and shares knowledge spanning various business streams and functions. To support this modern approach the LRTA has adopted a new structure featuring representatives and senior governance across the business streams and the LR Foundation. The Lloyd's Register Technical Association Papers should be seen as historical documents representing earlier viewpoints and are not reflective of current thinking and perspectives by the current LR Technical Association. The Lloyd's Register Staff Association LRSA changed its name to the Lloyd's Register Technical Association LRTA in 1973.

Journal Article Writing and Publication Sharon A. Gutman, 2024-06-01 The ability to demonstrate that a specific health care profession provides valuable and effective services that meet society's health needs is a major objective for all health care academicians and researchers. Such skills are critical to ensure service reimbursement from an increasingly small pool of health care dollars. Demonstrating clinical effectiveness depends on the reporting of written research results through journal publication so that the health care community and larger society will be able to access and read evidence supporting health care services. Today several clinical reporting standard guidelines have been created by researchers to enhance the ability of readers to evaluate the quality and value of studies. Journal Article Writing and Publication is the first text to compile those clinical research reporting standards in one source and helps educators and novice researchers to better understand the skills needed for journal publication. Health care researchers must begin using these reporting standards in order to write manuscripts that are both correctly formatted and transparently convey all critical study strengths and limitations. Educators must teach these reporting standards to students who must evaluate research reports as consumers and possible future contributors to the literature through their own writing. Journal Article Writing and Publication by Dr Sharon A Gutman, a former editor of the American Journal of Occupational Therapy, provides specific guidelines based on the most commonly accepted reporting standards for the preparation and writing of general research studies, intervention effectiveness studies, instrument development and testing studies, and case reports. A section is devoted to helping authors understand the rules governing the reporting of statistical data in text and tables. Separate sections help authors understand the manuscript preparation and submission process, the revision process, and the etiquette guiding communication with editors and reviewers. Guidelines for the preparation of

scholarly discussion papers and editorials are also provided Journal Article Writing and Publication also features a section that aims to help doctoral students and newly minted faculty turn academic work and dissertations into publishable journal articles Suggestions are provided to help clinicians turn clinical data into research databases that could serve as the foundation for pilot studies Finally information is provided to help authors better understand the ethical considerations of publication including plagiarism dual submissions inappropriate authorship copyright and conflict of interest
