*Metric Handbook* Pamela Buxton, 2021-11-25 The Metric Handbook is the major handbook of planning and design data for architects and architecture students with over 100 000 copies sold to successive generations of architects and designers. It remains the ideal starting point for any project and belongs in every design office. The seventh edition references the latest regulations and construction standards and includes new chapters on data centres and logistics facilities alongside basic design data for all the major building types. For each building type the book gives the basic design requirements and all the principal dimensional data and succinct guidance on how to use the information and what regulations the designer needs to be aware of. As well as buildings the Metric Handbook deals with broader aspects of design such as materials, acoustics and lighting and general design data on human dimensions and space requirements. The Metric Handbook is the unique reference for solving everyday planning problems.

Theatre Buildings Association of British Theatre Technicians (ABTT), Margaret Shewring, 2024-02-20 In 2021 its Diamond Jubilee year the Association of British Theatre Technicians ABTT undertook to revise *Theatre Buildings A Design Guide* Routledge 2010. This new edition Routledge 2023 has substantially re-written text with fresh images and entirely new reference projects providing essential guidance for all those engaged in the design of theatre buildings. Edited by Margaret Shewring Emeritus Reader University of Warwick former Director of the Postgraduate Diploma and MA in Theatre Consultancy this new publication is written by a team of international experts: architects, theatre consultants, acousticians, engineers and industry professionals led by Tim Foster, Foster Wilson, Size and Robin Townley, CEO of the ABTT. It provides an invaluable resource for those looking to build, remodel or conserve theatre buildings, taking into account the significant changes which have taken place in the last twelve years in all aspects of theatre design and technical practice. It locates those changes in the wider context of the need for sustainability in the theatre industry in response to the climate emergency, inclusivity, diversity of access, placemaking and concerns for health and wellbeing. This new edition provides guidance for anyone who seeks inspiration and encouragement to create or improve a place of entertainment or who seeks to understand what might be required to accommodate an audience for the presentation of live performance and the successful use, operation and organisation of such a venue. Its generous format and the thirty-two new reference projects, more than 260 high-resolution colour images and 175 diagrams and specially commissioned plans, make it accessible and informative both to the general reader and the professional specialist.
