25 Examples, 2015-01-17 It is always intriguing to hear or read what the thought process was of a particular image you like Thus here is my take on a group of photos I think photographers can use to learn a new technique camera setting or mind set for creating great images Every picture does have a story behind it and that story along with the technical considerations to get what was desired can lead to others possibly being able to move forward with their own photographic endeavors I myself learn more when I see an example of how to do something As photographers we are visual in nature and when putting the seeing alongside the how why and what circumstance can lead to an aha moment where you can then say I get it I want to go and try that for myself Highlights include Cloud Stacking Star Trails Fall Abstracts Birds in Flight Sunrise Sunset tips and tricks Subject position Foreground Background flow

[The Art, Science, and Craft of Great Landscape Photography, 2nd Edition](#) Glenn Randall, 2020-04-07 The Art Science and Craft of Great Landscape Photography 2nd Edition

teaches photographers how to convert their visual peak experiences moments of extraordinary natural beauty that evoke a sense of wonder and awe into stunning images that elicit the same awestruck emotion in their viewers Author Glenn Randall is an experienced wilderness photographer and whether you want to venture into the mountains for once in a lifetime shots of raw nature or simply hone your landscape photography skills from the safety of your back deck Randall explains the art science and craft behind creating stunning landscape photographs This fully updated edition of the best selling first edition includes nearly all new imagery throughout the book as well as a new first chapter Photographic Essentials to help beginners to landscape photography get up to speed quickly Additionally this second edition takes into account how Randall s techniques have changed and evolved since the first edition published from photographic practices to how he uses smart phones and apps as important and powerful tools for landscape photography After discussing photographic essentials Randall focuses on the art of landscape photography He describes his three step process for composing a photograph and shows how good composition is an organic process that begins with rules but ultimately transcends them Randall then explores the science behind successful landscape photographs which requires understanding key concepts from geography optics vision and psychology These concepts include How the position of the sun at sunrise and sunset varies throughout the year This will help you plan when and where to shoot Using optics to predict where rainbows will appear how polarizers will interact with reflections and where to find spectacular light How to use topographic maps and computerized mapping tools to help you find promising shooting locations in the wilderness Calculating exposures achieving correct exposure in high contrast lighting situations and the best digital darkroom techniques With some practice and by applying the techniques that Randall teaches you you will soon be ready to master the finer nuances of creating magnificent landscape photographs
