

Name: Kylee Brown	Date: 10/22/2022	Targeted Grade: 3rd Grade
Content & Focus of Lesson:		
<p>Science: The content focus of this lesson is for students to demonstrate an understanding of how habitats affect the diversity of organisms within. More specifically, students will know how to classify organisms into the following categories: producer, consumer, or decomposer. Students will learn that all organisms that make up surrounding habitats obtain energy differently. Over 5 days, students will have the opportunity to work hands on with their environment to have a better understanding of food chains and what type of organisms are found within.</p>		
<p>South Carolina Science Standard Standard 3.L.5: The student will demonstrate an understanding of how the characteristics and changes in environments and habitats affect the diversity of organisms.</p>		
<p>Indicator 3.L.SA.2: Develop and use a food chain model to classify organisms as producers, consumers, and decomposers and to describe how organisms obtain energy.</p>		
<p>Learning Objective(s): The students will be able to:</p> <ul style="list-style-type: none"> • Differentiate between the three types of organisms: producers, consumers, and decomposers. • Construct their own food chain based on the surrounding environment. • Formulate an explanation about how organisms obtain energy. 		
<p>Key Vocabulary Food Chain, Organism, Producer, Consumer, Decomposer, Energy, Environment, Habitat</p>		
<p>Background Science Content: In 2nd grade, student would have learned about how different types of animals survived within their changing environments. This knowledge will help students learn the importance of an organism's habitat in order to survive and obtain energy. Students will need to be aware that all animals, and organisms, live differently. Being aware of this will guide students to understand that all organisms throughout a habitat thrive and survive in different ways.</p>		
<p>Instructional Adaptations to Meet the Needs of Diverse Learners In order to adapt the lessons to meet the needs of diverse learners, I will provide a list of different organisms. By doing this, students who might not have a backyard or an area to observe will still be given the opportunity to create their own food chain.</p>		
<p>Materials Needed</p> <ul style="list-style-type: none"> • Paper • Pencil • Science Notebook 		
<p>Lesson Context Learners are between the ages of 8 and 9. At this age, hands-on activities are extremely helpful when trying to learn a concept. Throughout these lessons, there are multiple occurrences when students are able to participate in a hands-on activity. These lessons are considered to be developmentally appropriate for this age group.</p>		<p>Time Planned for this Lesson Instruction will take place over the course of 5 days.</p>
<p>Engage - To begin the lesson, I will have the entire class create a list of all the things they eat in a day. By doing this, students will have to think back to the previous day of what they ate. Once these lists are created, students will get to discuss with their table groups about the lists that they have created. I will ask the students to "think of reasons of why it is important for humans to</p>

Harnessing AI's Potential to Support Student Success and Teaching Excellence Araujo, Juan J., Snider, Sharla, 2025-07-15 With the integration of AI in educational environments AI has shaped the way schools operate and support students. Personalized learning platforms and tutoring systems have transformed the traditional schooling system for the better. However, the deployment of AI in school settings also raises critical questions around equity, privacy, ethical use and the role of educators in a technology enhanced landscape. Examining the impact of AI usage in schools is essential to understand both its potential to enhance educational outcomes and the challenges that must be addressed to ensure it serves all learners effectively and responsibly. Harnessing AI's Potential to Support Student Success and Teaching Excellence explores the landscape of AI in education and how it has helped and hindered school settings. This book highlights both the transformative potential of AI and the risks associated with its unchecked advancement, emphasizing the importance of responsible innovation in education. Covering topics such as education, AI and technology, this book is an excellent resource for teachers, administrators and policymakers searching for the right approach for such AI implementation.

Pedagogy, 2022-10-12 Developments in the field of technology along with the Covid 19 pandemic have caused many significant changes and transformations in this century. As such, countries need individuals equipped with 21st century skills. This requires schools to consider the challenges faced by both students and teachers and develop educational programs to train qualified individuals who can respond to the developments in this century and the future. This book discusses the challenges, advances and applications in the professional development of teachers and other educators at all academic levels.

Teaching K-5 Science Coral Zayas, 2026-04-07 Teaching K-5 Science empowers teachers, especially those new to the field, with tools, strategies and knowledge to improve their practice. It offers strategies for engaging diverse learners and explores ways of connecting the science curriculum to students' daily lives. This book also appeals to administrators looking for resources to support teachers' professional development, emphasizing STEAM pathways and incorporating the Next Generation Science Standards (NGSS) into classrooms. With research-based strategies that emphasize the 5 Es of science instruction (explore, explain, elaborate, and evaluate), Teaching K-5 Science provides sound guidance for educators in today's evolving classrooms.
