5E LESSON PLAN TEMPLATE

Revised 1-5-2016

Teacher Candidate:	N/A
Grade Level:	1 st Grade
Date:	6/6/2020
Unit/Subject:	Science
Instructional Plan Title	The Plant Life Cycle
I. PLANNING	
Lesson Summary and Focus:	Students will identify the life cycle of a plant and the parts of a plant and how the parts helps the plant grow. Students will need to reflect on a current human problem and reflect on how it can be solved using the aspects of a plant. Students will conduct research and create a separate diagram for the lifecycle and parts of a plant.
Instructional Materials, Equipment, and Technology:	Student Supplies: Anchor Chart Paper Markers Pencils Chromebook Internet Access Notebook Paper for Notes Scissors Glue Teacher Supplies: White Board Projector Internet Access Printed Vocabulary Words Printed Vocabulary Sheets with Images
Classroom and Student Factors:	There are 30 students in this class. About half the class is low income (13), 4 students are diagnosed with learning disabilities and 1 has an emotional disability. 4 ELL students and 9 without internet at home. Reading: There are 8 students one year below grade level, 1 student two years below, 15 students at grade level, 4 students one year above, and 2 students two years above reading level. 5 of these students are receiving Response to Intervention (RTI) in reading. When introducing new vocabulary, introduce definition and place on word wall. Provide image if available.
National / State Learning Standards:	Life Science 1.L.1.U1.6: Observe, describe and predict life cycles of plants. NGSS 1-LS1 From Molecules to Organisms: Structures and Processes Use materials to design a solution to a human problem by mimicking how plants and/or animals use their external parts to help them survive, grow, and meet their needs. -Examples of human problems that can be solved by mimicking plant or animal solutions could include designing clothing or equipment to protect bicyclists by mimicking turtle shells, acorn shells, and animal scales; stabilizing structures by mimicking animal tails and roots on plants; keeping out intruders by mimicking thorns on branches and animal quills; and, detecting intruders by mimicking eyes and ears.
Specific Learning Targets/Objectives: Students will explain the plant life cycle using correct vocabulary and identify the parts of a plant and how they function to help the plant survive.

Moving INTO the Classroom Stacia C Miller, Suzanne F Lindt, 2017-09-06 This textbook focuses on research in movement integration and the benefits of physical activity to the child s physical cognitive emotional and social development It includes research on and suggestions for integrating movement into English language arts mathematics science and social studies for lower and upper elementary students Though the textbook is specifically aimed at elementary level teachers secondary teachers and pre service teachers can modify the activities to fit their lessons as well

The Science I Know Suzanna Roman-Oliver, 2024-07-08 The Science I Know Culturally Relevant Science Lessons from Secondary Classrooms is a collection of culturally relevant lesson plans written by secondary science teachers Each lesson discusses how the tenets of academic success cultural competence and critical consciousness that are part of the theory of Culturally Relevant Pedagogy CRP are addressed Ladson Billings 1995 Additionally each lesson plan is structured following the 5E learning cycle Bybee 2006 and aligned to the Next Generation Science Standards NAS 2012 The goal of this book is to help science teachers understand how to go about designing lessons that are culturally relevant The hope is that the lessons that are detailed in each chapter will inspire teachers to draw the cultural knowledge from their students and capitalize on it when designing science lessons After an introductory chapter that discusses how science education has shifted in recent decades to address the needs of diverse students the main body of the text is divided into three sections The first part introduces Culturally Relevant Pedagogy CRP as a framework this is important for those readers unfamiliar with Gloria Ladson Billings work It addresses and discusses the three tenets of CRP Academic Success Cultural Competence and Critical Consciousness and it includes an explanation of how each area can be observed and addressed in science education specifically The second part features lesson plans from secondary science classrooms written by teachers

from different subject areas i.e. life science, physical science, earth science etc. The lesson plans follow the 5E Instructional Model (Bybee et al, 2006). This model promotes inquiry by guiding teachers in the design of lesson plans that are based upon cognitive psychology, constructivist learning theory and best practices in science teaching.

Primary Science Education

Anne Forbes, 2023-06-15

Primary Science Education: A Teacher's Toolkit is an accessible and comprehensive guide to primary school science education and its effective practice in the classroom. Primary Science Education is structured in two parts: Planning for Science and Primary Science in the Classroom. Each chapter covers fundamental topics such as curriculum requirements including the Australian Curriculum and Australian Professional Standards for Teachers, preparing effective learning sequences with embedded authentic assessment, combining science learning with other learning areas such as technologies and STEM, and critically analysing the teacher's role in the classroom. The text features short answer and Bringing it Together questions to encourage readers to consolidate their understanding of key themes. Case studies throughout provide guidance on the classroom experience, and Teacher Background Information boxes explore topics where more in-depth knowledge is required. The book is supported by a suite of online resources including interviews with Australian primary teachers and students and downloadable activities.

The Art of Teaching Science

Vaile Dawson, Jennifer Donovan, 2020-07-16

The Art of Teaching Science has proven itself to be one of the most popular introductory texts for Australian pre-service and in-service teachers, providing guidance on engaging students and helping develop scientifically literate citizens. Beginning with an examination of the nature of science, constructivist and socio-cultural views of teaching and learning, and contemporary science curricula in Australian schools, the expert authors go on to explore effective teaching and learning strategies, approaches to assessment, and provide advice on the use of ICT in the classroom. Fully revised and updated, this edition also reflects the introduction of the AITSL professional standards for teachers and integrates them throughout the text. New chapters explore a range of teaching strategies including explicit instruction, active learning, and problem-based learning; the effective integration of STEM in schools; approaches to differentiation in science education; and contemporary uses of ICT to improve student learning. Those new to this text will find it is deliberately written in user-friendly language. Each chapter stands alone, but collectively they form a coherent picture of the art, in the sense of creative craft, of science as in possessing the knowledge, understanding, and skills required to effectively teach secondary school science. Helping each new generation of school science teachers as they begin their careers is crucial to education. This is the updated third edition of this valuable textbook. It contains a wonderful range of inspirational chapters. All science teachers, not only those at the start of the profession, would benefit from it in Australia and beyond.
