*Mounted Oriental Porcelain in the J. Paul Getty Museum* F. J. B. Watson, Gillian Wilson, Anthony Derham, 1983-01-01 Ever since the Middle Ages it was the practice in Europe to mount exotic objects such as oriental porcelain in settings of precious or semiprecious metal as tribute to their rarity and value In the seventeenth century when Chinese and Japanese porcelains began to reach the West in considerable quantities the practice continued especially in France With the opening of the eighteenth century it became increasingly fashionable in Parisian society to decorate the interiors of houses with Far Eastern materials such as lacquer and mounted porcelain This taste was catered to by the marchands merciers members of a guild who combined the functions of the modern interior decorator the antique dealer and the picture dealer These men devised highly ingenious settings for Far Eastern porcelains to adapt their exotic character to the French interiors of the period At first these were of silver occasionally even gold later during the Rococo period when gilding was very lavishly used for the decoration of walls furniture light fittings etc gilt bronze was the material generally adopted The marchands merciers not only designed such mounts and employed some of the most skillful craftsmen of the day to execute them but also marketed them The survival of the account book of one of their number Lazare Duvaux whose shop Au Chagrin de Turquie in the rue Saint Honor was patronized by the most fashionable sections of Parisian society has provided us with an immense amount of information about mounted oriental porcelain its makers its cost who collected it and so on This information has been drawn on in cataloguing the Getty Museum s collection of mounted oriental porcelain which is unusually large and of exceptionally high quality

Reclamation,David S. Stoner,1950 Tissue Crosstalk in Obesity and Diabetes: A Focus on Skeletal Muscle M. Dulce Estêvão,Carles Lerin,Ana Luísa De Sousa-Coelho ,Mary Patti,2025-12-05 In the complex biological system of higher organisms the maintenance of metabolic homeostasis requires intricate crosstalk among the different organs that constitute the body This inter organ communication allows one tissue to affect metabolic pathways in a distant tissue Dysregulation of this communication contributes to human pathologies including obesity diabetes liver diseases and certain cancers Skeletal

muscle plays a central role in glucose homeostasis namely by secreting myokines that can contribute to the regulation of metabolic processes in other organs such as liver and adipose tissue This collection aims to shed light onto the complex tissue crosstalk underlying metabolic diseases specifically obesity and diabetes It will highlight the latest research exploring such metabolic crosstalk with a focus on skeletal muscle Contributions exploring the regulation of metabolic interactions through diet and exercise the interaction between the gut microbiome and the host and tissue dysregulation in obesity and diabetes are examples of areas that will enrich this issue Studies that use network based approaches to explore tissue communications relevant to metabolic diseases are welcome These may be original findings or comprehensive reviews This research topic will provide a platform for scientists to share their findings and contribute to a better understanding of the complex interplay between tissues in the context of obesity and diabetes focusing on the central role of skeletal muscle We believe that this issue will not only provide novel insights into the pathogenesis of these diseases but also pave the way for the development of precision therapies against various illnesses associated with metabolic dysregulation To explore the crosstalk between skeletal muscle adipose tissue liver and other organs in the development of obesity insulin resistance and type 2 diabetes topics of interest include but are not limited to Myokines and skeletal muscle function Liver and adipose tissue crosstalk interactions Adipose tissue and skeletal muscle interaction Diet and exercise in metabolic regulation Therapeutic interventions targeting skeletal muscle in obesity and diabetes *Rivisteria* ,1998 Memling's Portraits Till Borchert,Hans Memling,2005 Bulletin de la Société scientifique industrielle de Marseille Société scientifique industrielle de Marseille,1894 *Journal officiel de la République Française* Frankreich,1893 *Bulletin des lois de la République Française* Frankreich,1899 Kelly's Directory of Merchants, Manufacturers and Shippers ,1930 **Catalogue of Scientific Papers: Third series 1874-1883** Royal Society (Great Britain),1891 *Annals of the Metropolitan Opera: Tables 1883-1985* ,1989 **Cumulated Index Medicus** ,1983 **The Best of France** ,1989 More than 950 provocative and frank reviews of restaurants hotels nightspots and shops in France The most famous and irreverent guide to the art of fine living distinguishes between the truly superlative and the merely overrated
