Journal of Social Studies Research ,2006 Resources in Education ,1999-10 *Using Literacy Strategies to Enhance Social Studies Education in Elementary Classrooms* Kristy A. Brugar, Kathryn L. Roberts, 2025-04-09 Elementary teachers often with their students for most or all of the day have the opportunity to creatively integrate instruction across classes In this text we explore meaningful pedagogical cross over that goes beyond the surface level to build strong foundations and deep connections for teaching and learning in interdisciplinary ways Subject Guide to Books in Print ,1997 **Looking in Classrooms** Thomas L. Good, Alyson L. Lavigne, 2017-12-15 Looking in Classrooms uses educational psychological and social science theories and classroom based research to teach future classroom teachers about the complexities and demands of classroom instruction While maintaining the core approach of the first ten editions the book has been thoroughly revised and updated with new research based content on teacher evaluation self assessment and decision making special emphases on teaching students from diverse ethnic cultural class and gender identity contexts and rich suggestions for integrating technology into classroom instruction Widely considered to be the most comprehensive and authoritative source available on effective successful teaching Looking in Classrooms synthesizes the knowledge base on student motivation classroom management teacher expectations teacher effectiveness adaptive instruction for individual learners and informative observational techniques for enhancing teaching It addresses key topics in classroom instruction in an accessible fashion promoting easy interpretation and transfer to practice and articulates the roles of teacher centered pedagogy student centered instruction and project based learning in today s classroom Guided by durable historical knowledge as well as dynamic emerging conceptions of teaching this text is ideal for undergraduate teacher training programs and for masters level courses for teachers administrators and superintendents **Social Studies & the Young Learner** ,2005 The Social Studies Professional ,2005 Funding Public Schools Kenneth K. Wong, 1999 This book examines the fundamental role of politics in funding our public schools and fills a conceptual imbalance in the current literature in school finance and educational policy Unlike those who are primarily concerned about cost efficiency Kenneth Wong specifies how resources are allocated for what purposes at different levels of the government In contrast to those who focus on litigation as a way to reduce funding gaps he underscores institutional stalemate and the lack of political will to act as important factors that affect legislative deadlock in school finance reform Wong defines how politics has sustained various types of rules that affect the

allocation of resources at the federal state and local level While these rules have been remarkably stable over the past twenty to thirty years they have often worked at cross purposes by fragmenting policy and constraining the education process at schools with the greatest needs Wong s examination is shaped by several questions How do these rules come about What role does politics play in retention of the rules Do the federal state and local governments espouse different policies In what ways do these policies operate at cross purposes How do they affect educational opportunities Do the policies cohere in ways that promote better and more equitable student outcomes Wong concludes that the five types of entrenched rules for resource allocation are rooted in existing governance arrangements and seemingly impervious to partisan shifts interest group pressures and constitutional challenge And because these rules foster policy fragmentation and embody initiatives out of step with the performance based reform agenda of the 1990s the outlook for positive change in public education is uncertain unless fairly radical approaches are employed Wong also analyzes four allocative reform models two based on the assumption that existing political structures are unlikely to change and two that seek to empower actors at the school level The two models for systemwide restructuring aimed at intergovernmental coordination and or integrated governance would seek to clarify responsibilities for public education among federal state and local authorities above all integrating political and educational accountability The other two models identified by Wong shift control from state and district to the school one based on local leadership and the other based on market forces In discussing the guiding principles of the four models Wong takes care to identify both the potential and limitations of each Written with a broad policy audience in mind Wong s book should appeal to professionals interested in the politics of educational reform and to teachers of courses dealing with educational policy and administration and intergovernmental relations
