## *Energy and Food Chains and Webs*

**Lesson 3: What are Food Chains?**

My class creates diagrams that focus focused on food chains and what plants and animals need to survive in specific environments.

1. Ask students if they have ever seen a food chain, what do they know. Tell them that when there is a relationship between two organisms in a food chain, there must be energy transfer.
2. Discuss the concepts in the video, Human Food Chain (Example: Peacock) is included to aid in the discussion. Encourage them that humans are top level consumers with only known predators.
3. Partner students up and have them to another example of a human food chain (other than sun and at least three other things).
4. Project the blank triangular food chain students to have key concepts that are the listed in sheet).

The 5 Steps to a 5 series has prepared millions of students for success.

**Constructing Science in Elementary Classrooms** Norman G.

Lederman, Judith S. Lederman, Randy L. Bell, 2004 Solidly based on the National Science Education Standards and Benchmarks for Science Literacy this new elementary science methods text immerses students into the context of classroom instruction through the authors unique approach using The Teaching Cycle. The text is divided into three major sections or clusters of chapters Goals of Science Instruction Setting the Stage and The Teaching Cycle. The first two sections provide the theoretical and practical foundations for instruction while the third section provides content. Section I presents an overall view of science as a way of knowing and eventually develops an argument for why science should be included in the curriculum at all. Section II emphasizes the importance of connecting lessons and avoiding the tendency to present individual science lessons in isolation. The major content chapters comprising Section III The Teaching Cycle Life Environmental Science Physical Science Earth and Space Science each incorporate the traditional topics of methods courses e.g. demonstrations laboratories classroom management assessment developmental psychology etc concepts and themes common to national reforms.
