Passage 2: Poaching

1. It is quite possible that in the next fifty years, endangered animals such as the rhinoceros and the elephant will become extinct. One of the biggest causes of this population decline is poaching, which is the illegal hunting of animals, usually because some part of the animal is considered valuable for

2. Africa and Asia are home to some of the most valuable animals in the world, and this poaching usually occurs in protected lands, such as a national forest. The horns of many poached animals bring in substantial prices sold all across the world. For example, the horn of an elephant is more expensive than gold and is viewed as a status symbol in many African countries. An elephant's ivory tusks are considered to be extremely valuable, as well, and are used in ivory and other expensive trinkets. Hearing half of Africa's elephant population has been wiped out due to poaching, and rhinoceros could face extinction if they continue to be killed for their skins. Many parts of poached animals are used in traditional medicine, though none of these parts have been proven to have any medicinal benefit.

**Kaplan No-Stress Guide to the New York State 8th Grade Tests** Cynthia Johnson,Drew Johnson,2001 Vincent Descombes brings together an astonishingly large body of philosophical and anthropological thought to present a thoroughgoing critique of contemporary cognitivism and to develop a powerful new philosophy of the mind Beginning with a critical examination of American cognitivism and French structuralism Descombes launches a more general critique of all philosophies that view the mind in strictly causal terms and suppose that the brain and not the person thinks Providing a broad historical perspective Descombes draws surprising links between cognitivism and earlier anthropological projects such as Levi Strauss s work on the symbolic status of myths He identifies as incoherent both the belief that mental states are detached from the world and the idea that states of mind are brain states these assumptions beg the question of the relation

between mind and brain In place of cognitivism Descombes offers an anthropologically based theory of mind that emphasizes the mind's collective nature Drawing on Wittgenstein he maintains that mental acts are properly attributed to the person not the brain and that states of mind far from being detached from the world require a historical and cultural context for their very intelligibility Available in English for the first time this is the most outstanding work of one of France's finest contemporary philosophers It provides a much needed link between the continental and Anglo American traditions and its impact will extend beyond philosophy to anthropology psychology critical theory and French studies **Fact Sheet**, 1991
