Keeping Secrets: The Science of Cryptography

1. Cryptography is the science of writing secret messages that are not just plain text. These are often referred to as ciphers. Cryptography is used to keep messages from being read by unauthorized people. It is also used to keep messages from being altered or destroyed.

2. Cryptography is used to protect the privacy of messages. It is often used to protect sensitive information, such as financial data, medical records, and personal information. It is also used to protect messages from being intercepted or tampered with.

3. Modern privacy technologies, such as the Data Protection Directive, have made it easier to protect personal information. These technologies include encryption, which is the process of turning plain text into cipher text. They also include the use of secure servers and secure communication channels.

4. Many are used to protect sensitive data, such as financial information, medical records, and personal information. These technologies include encryption, which is the process of turning plain text into cipher text.

5. Most forms of digital communication, such as email and messaging, use encryption to protect messages. This is done to ensure that messages are not intercepted or tampered with.

6. Cryptography is often used to protect sensitive data, such as financial information, medical records, and personal information. It is also used to protect messages from being intercepted or tampered with.

7. Cryptography is often used to protect sensitive data, such as financial information, medical records, and personal information. It is also used to protect messages from being intercepted or tampered with.

8. Cryptography is often used to protect sensitive data, such as financial information, medical records, and personal information. It is also used to protect messages from being intercepted or tampered with.

9. Cryptography is often used to protect sensitive data, such as financial information, medical records, and personal information. It is also used to protect messages from being intercepted or tampered with.

10. Cryptography is often used to protect sensitive data, such as financial information, medical records, and personal information. It is also used to protect messages from being intercepted or tampered with.

11. Cryptography is often used to protect sensitive data, such as financial information, medical records, and personal information. It is also used to protect messages from being intercepted or tampered with.
