Hydrogen peroxide is a colorless, odorless liquid that is used in many applications. It is a powerful oxidizing agent and is used in many industrial processes. It is also used in the laboratory for the analysis of hydrogen peroxide. The analysis of hydrogen peroxide is a common laboratory procedure. It is used to determine the concentration of hydrogen peroxide in a sample. The analysis is performed by measuring the volume of oxygen gas that is produced when a known volume of hydrogen peroxide is decomposed. The volume of oxygen gas is measured by the displacement of water in a graduated cylinder. The concentration of hydrogen peroxide is then calculated from the volume of oxygen gas produced.
