Mustafy,Md. Tauhid Ur Rahman,2024-01-10 This textbook summarizes the different statistical scientific and financial data analysis methods for users ranging from a high school level to a professional level It aims to combine the data analysis methods using three different programs Microsoft Excel SPSS and MATLAB The book combining the different data analysis tools is a unique approach The book presents a variety of real life problems in data analysis and machine learning delivering the best solution Analysis methods presented in this book include but are not limited to performing various algebraic and trigonometric operations regression modeling and correlation as well as plotting graphs and charts to represent the results Fundamental concepts of applied statistics are also explained here with illustrative examples Thus this book presents a pioneering solution to help a wide range of students researchers and professionals learn data processing interpret different findings derived from the analyses and apply them to their research or professional fields The book also includes worked examples of practical problems The primary focus behind designing these examples is understanding the concepts of data analysis and how it can solve problems The chapters include practice exercises to assist users in enhancing their skills to execute statistical analysis calculations using software instead of relying on tables for probabilities and percentiles in the present world
