Global Trade Law Series Volume 55 India one of the world's foremost trading nations exhibits a particularly complex regulatory landscape with a variety of standard setting bodies, regulators, accreditation and certification bodies, inspection agencies, as well as several state level regulators. This is the first book to extensively describe the nature of standard setting processes in India and the key agencies involved with this task, greatly clarifying the scope of market opportunities in the country. Lucid contributions from experienced practitioners and regulators with first hand experience in formulating and advising on standards related issues in international trade help disentangle the web of laws, regulations, operations and functions of India's standard setters in governmental, non governmental and industry contexts. The chapters describe how standards apply to such crucial trade aspects as the following: conformity assessment practice and procedure, environmental, ethical, social and safety issues, import bans and import licensing, certification and labelling measures, mutual recognition agreements, food safety and standardisation of the digital economy. The book is drafted throughout in an easy to read style with numerous tables, flowcharts and figures illustrating step by step compliance procedures. Informative annexes guide the reader to relevant agencies and identify their roles and responsibilities. This book provides a clear and concise guide to the operations, functions and compliance and documentation requirements of India's standard setting and regulatory bodies across all sectors and products and thus will serve as an unmatched guide for manufacturers, traders and exporters operating

in the Indian market or seeking to export to India It will also serve as a useful Handbook to policymakers academics and researchers interested in understanding the role of standard setting bodies in the field of international trade      **Secondary Education** ,1965    *English Mechanics and the World of Science* ,1889    *English Mechanic and World of Science* ,1889
