Primary Mathematics Pedagogy at the Intersection of Education Reform, Policy, and Culture Sarah Murray, Princess Allotey, 2021-11-29 This volume provides an in depth comparative examination of how primary mathematics education is influenced by national education reform policy local resources and culture in three different countries By drawing on first hand observations and interviews as well as analysis of policy documents and learning resources the book considers the viability of transferring best practices in primary mathematics education across global contexts Three diverse countries Ghana the US and Singapore are explored Similarities and differences are highlighted and the influence of national and regional initiatives related to pedagogical strategies teacher education and cultural expectations are considered to offer an insightful examination of how best practices might be shared across borders This book will benefit researchers academics and postgraduate scholars with an interest in international and comparative education mathematics and educational policy Those with a specialization in primary mathematics education including pedagogy and teacher preparation will also benefit from this book

The Concerns Based Adoption Model (CBAM) Gene E. Hall, 2025-04-01 Change can be interesting challenging easy difficult and sometimes fun The Concerns Based Adoption Model CBAM Constructs Evidence Applications and Implications for Facilitating Change edited by Gene E Hall a key originator of CBAM uses a research tested model to introduce students in education to ways of thinking strategies and steps that leaders can take to facilitate and advance change processes in their own schools The primary focus of this book and method is on understanding the thoughts perceptions feelings and concerns of the people who are engaged with change and finding systematic ways to address them This edited volume provides clear instruction from researchers who know CBAM best experiences and case studies from a wide variety of educational settings and strong pedagogy so readers can learn CBAM and apply this model to their educational systems

Asia's High Performing Education Systems Colin Marsh, John Chi-Kin Lee, 2014-07-17 Education officials specialist leaders and teachers have all been involved in different ways to bring about school reform in Hong Kong This book is a very current and relevant analysis of this reform highlighting the way in which agencies have cooperated in bringing about change over the last several decades Through a process of wide ranging decision making collaboration and consensus among key bodies and agencies of change some important developments have occurred The reforms collectively have had and are continuing to have a major impact upon schooling in Hong Kong This volume represents a range of authors and specialists involved in a number of different reforms covering themes such as historical policy contexts new curriculum approaches changing pedagogies school leadership implementation and change and assessment and evaluation This is a very topical book which provides a probing analysis of how an Asian education system has been able to reach and maintain a very high performing level

Heterogeneous Contributions to Numerical Cognition Wim Fias, Avishai Henik, 2021-05-28 Arithmetic disability stems from deficits in neurodevelopment with great individual differences in development or function of

an individual at neuroanatomical neuropsychological behavioral and interactional levels Heterogeneous Contributions to Numerical Cognition Learning and Education in Mathematical Cognition examines research in mathematical education methods and their neurodevelopmental basis focusing on the underlying neurodevelopmental features that must be taken into account when teaching and learning mathematics Cognitive domains and functions such as executive functions memory attention and language contribute to numerical cognition and are essential for its proper development These lines of research and thinking in neuroscience are discussed in this book to further the understanding of the neurodevelopmental and cognitive basis of more complex forms of mathematics and how to best teach them By unravelling the basic building blocks of numerical thinking and the developmental basis of human capacity for arithmetic this book and the discussions within are important for the achievement of a comprehensive understanding of numerical cognition its brain basis development breakdown in brain injured individuals and failures to master mathematical skills A novel innovative reference on the emerging field of numerical cognition and neurodevelopment underlying mathematical education Includes an overview of the multiple disciplines that comprise numerical cognition written by world leading researchers in the numerical cognition and neurodevelopment fields Features an innovative organization with each section providing a general overview developmental research neurocognitive mechanisms and discussion about relevant studies *CMUC*, 2012 School Resources, the Achievement Gap, and the Law David J. Armor, John R. Munich, Aron Malatinszky, 2024-01-12 This book offers a novel and up to date exploration of the common belief that increasing conventional school resources will increase academic achievement and help close gaps between various advantaged and disadvantaged students Taking the scholarship around this question such as James S Coleman s 1965 report on the Equality of Educational Opportunity as a starting point it brings in an extensive range of contemporary data sources and statistical analysis to offer an updated robust and considered review of the issue Moving beyond these empirical questions it also explores how these empirical findings have been utilized in education adequacy litigation discussing the evolving law of adequacy cases while explaining the challenges of introducing complex data and analyses within a litigation framework Judges typically have little experience with the complexity of modern education data and the analyses required to draw sound inferences It will thus be of interest to scholars researchers and faculty and jurists with expertise or interest in education policy the economics and sociology of education and public policy

Culturally Responsive Assessment in Classrooms and Large-Scale Contexts Carla M. Evans, Catherine S. Taylor, 2025-03-10 Culturally Responsive Assessment in Classrooms and Large Scale Contexts explores how scholars and professionals in educational measurement and assessment can use the unique cultural and social identities of students to shape assessment purpose design implementation use and validation processes Despite the sheer diversity of student populations in the United States the tools used to understand their performance and progress have not substantively changed in decades Large scale testing and related policies still privilege culturally neutral test content standardization and

comparability Classroom assessments often mimic these procedures even though rich tasks and activities could easily be incorporated into curriculum and instruction to allow students to see themselves their interests communities beliefs and backgrounds represented and valued This book collects the theory research and best practices that are essential to ensuring cultural responsiveness in classroom assessment and standardized testing procedures policies and practices Chapters by assessment and measurement experts along with scholars who are experts in sociocultural learning theory philosophy of education critical theories multilingual education and Indigenous education summarize findings from existing research and suggest how future research can move classroom and industry practice as well as federal state and local policy forward
