Reconceptualizing STEM Education Richard A. Duschl, Amber S. Bismack, 2016-01-08 Reconceptualizing STEM Education explores and maps out research and development ideas and issues around five central practice themes Systems Thinking Model Based Reasoning Quantitative Reasoning Equity Epistemic and Ethical Outcomes and STEM Communication and Outreach These themes are aligned with the comprehensive agenda for the reform of science and engineering education set out by the 2015 PISA Framework the US Next Generation Science Standards and the US National Research Council s A Framework for K 12 Science Education The new practice focused agenda has implications for the redesign of preK 12 education for alignment of curriculum instruction assessment STEM teacher education and professional development postsecondary further and graduate studies and out of school informal education In each section experts set out powerful ideas followed by two eminent discussant responses that both respond to and provoke additional ideas from the lead papers In the associated website highly distinguished nationally recognized STEM education scholars and policymakers engage in deep conversations and considerations addressing core practices that guide STEM education

STEM Integration in K-12 Education National Research Council, National Academy of Engineering, Committee on Integrated STEM Education, 2014-02-28 STEM Integration in K 12 Education examines current efforts to connect the STEM disciplines in K 12 education This report identifies and characterizes existing approaches to integrated STEM education both in formal and after and out of school settings The

report reviews the evidence for the impact of integrated approaches on various student outcomes and it proposes a set of priority research questions to advance the understanding of integrated STEM education STEM Integration in K 12 Education proposes a framework to provide a common perspective and vocabulary for researchers practitioners and others to identify discuss and investigate specific integrated STEM initiatives within the K 12 education system of the United States STEM Integration in K 12 Education makes recommendations for designers of integrated STEM experiences assessment developers and researchers to design and document effective integrated STEM education This report will help to further their work and improve the chances that some forms of integrated STEM education will make a positive difference in student learning and interest and other valued outcomes Thinking Evolutionarily National Research Council,Division on Earth and Life Studies,Board on Life Sciences,Planning Committee on Thinking Evolutionarily: Making Biology Education Make Sense,2012-05-31 Evolution is the central unifying theme of biology Yet today more than a century and a half after Charles Darwin proposed the idea of evolution through natural selection the topic is often relegated to a handful of chapters in textbooks and a few class sessions in introductory biology courses if covered at all In recent years a movement has been gaining momentum that is aimed at radically changing this situation On October 25 26 2011 the Board on Life Sciences of the National Research Council and the National Academy of Sciences held a national convocation in Washington DC to explore the many issues associated with teaching evolution across the curriculum Thinking Evolutionarily Evolution Education Across the Life Sciences Summary of a Convocation summarizes the goals presentations and discussions of the convocation The goals were to articulate issues showcase resources that are currently available or under development and begin to develop a strategic plan for engaging all of the sectors represented at the convocation in future work to make evolution a central focus of all courses in the life sciences and especially into introductory biology courses at the college and high school levels though participants also discussed learning in earlier grades and life long learning Thinking Evolutionarily Evolution Education Across the Life Sciences Summary of a Convocation covers the broader issues associated with learning about the nature processes and limits of science since understanding evolutionary science requires a more general appreciation of how science works This report explains the major themes that recurred throughout the convocation including the structure and content of curricula the processes of teaching and learning about evolution the tensions that can arise in the classroom and the target audiences for evolution education The Qualified Student Harold S. Wechsler,2017-09-29 In The Qualified Student Harold S Wechsler focuses on methods of student selection used by institutions of higher education in the United States More specifically he discusses the way that college and university reformers employed those methods to introduce higher education into a broader cross section of America by extending access to an increased number of students from nontraditional backgrounds Implicit in much of this book is an underlying social and ethical question How legitimate was and is higher education s regulation of social mobility Public concern over colleges and universities practices became

inevitable once they became regulators between social classes The challenging of colleges admissions policies in the courts augments similar concerns that have been present in legislatures for decades The volume is divided into three main sections Prerequisites Columbia and the Selective Function and Implications It focuses mainly on four universities The University of Michigan Columbia University the University of Chicago and the City University of New York Wechsler maintains that unlike other universities these institutions were pacesetters they did not adopt a new policy simply because some other college had already adopted it A new introduction brings the book originally published in 1977 up to date and demonstrates its continuing importance in today s academic world of selective admissions
