The Rise and Fall of Nations Ruchir Sharma,2016-07-20 The crisis of 2008 ended the illusion of a golden era in which many people imagined that prosperity and political calm would continue to spread indefinitely In a world now racked by slowing growth and mounting unrest how can we discern which nations will thrive and which will fail Shaped by prize winning author Ruchir Sharma s twenty five years travelling the world *The Rise and Fall of Nations* rethinks economics as a practical art By narrowing down the thousands of factors that can shape a country s future it spells out ten clear rules for identifying the next big winners and losers in the global economy Each rule looks at a nation s political economic and social conditions in real time to filter out the hype and noise He shows for example how slow population growth is eroding economic growth and ranks nations by how well they respond He describes the way cycles of political complacency and revolt fuel economic booms and busts Amid growing tensions over inequality he demonstrates how billionaire lists yield clues to which economies are most or least threatened by extreme wealth In a period when the world is struggling with trillions of

dollars in new debt he explains which nations are most likely to avert this threat or buckle under it Sharma s rules are based on the data he has collected over many years at Morgan Stanley Investment Management in New York where he is now Head of Emerging Markets and Chief Global Strategist This is a book of original research not mere opinion The final chapter takes the reader on a surprising world tour of the likely winners and losers in the near future The Rise and Fall of Nations is enlivened by Sharma s stories from the road and his encounters with presidents tycoons and villagers from Rio to Beijing It is a pioneering field guide to understanding our impermanent world Global Assessment Report on Disaster Risk Reduction 2013 United Nations,2013 This publication is the third biennial report coordinated by the United Nations Office for Disaster Risk Reduction UNISDR The first and second reports focused primarily on public policy and the role of national and local governments in disaster risk reduction This current report explores why increasing disaster risks represent a growing problem for the economic and business community at different scales It examines how paradoxically business investments that aimed to strengthen competitiveness and productivity may have inadvertently contributed to increasing risks This report seeks to engage businesses in a dialogue on disaster risk management that goes beyond the current emphasis on response and preparedness and instead identifies opportunities for the creation of shared value for business and society
