The Computer Supported Collaborative Learning (CSCL) Conference 2013, Volume 1 ISLS, 2014-04-23 *The Computer Supported Collaborative Learning CSCL Conference 2013 proceedings Volume 1 Teaching and Learning Mathematics Online* James P. Howard, II, John F. Beyers, 2025-06-30 *Teaching and Learning Mathematics Online Second Edition* continues to present meaningful and practical solutions for teaching mathematics and statistics online. It focuses on the problems observed by mathematics instructors currently working in the field who strive to hone their craft and share best practices with the community. The book provides a set of standard practices improving the quality of online teaching and the learning of mathematics. Instructors will benefit from learning new techniques and approaches to delivering content. New to the Second Edition: Nine brand new chapters: Reflections on the lessons of COVID 19, Explorations of new technological opportunities. **It's TIME** National Council of Supervisors of Mathematics, 2014-03-04 Help all students become high achieving mathematics learners. Gain a strong understanding of mathematics culture and learn necessary best practices to fully align curriculum and instruction with the CCSS for mathematics. You'll explore the factors that have traditionally limited mathematics achievement for students and discover practical strategies for creating an environment that supports mathematics learning and instruction. *Multidisciplinary Approaches to Understanding Early Development of Spatial Skills: Advances in Linguistic, Behavioral, and Neuroimaging studies* Hui Li, Jin Sun, Xiao Zhang, 2021-06-04 **Early Warning Systems and Targeted Interventions for Student Success in Online Courses** Glick, Danny, Cohen, Anat, Chang, Chi, 2020-06-26 Online learning has increasingly been viewed as a possible way to remove barriers associated with traditional face to face teaching such as overcrowded classrooms and shortage of certified teachers. While online learning has been recognized as a possible approach to deliver more desirable learning outcomes, close to half of online students drop out as a result of student related, course related, and out of school related factors, e.g. poor self regulation, ineffective teacher student interaction, and platform student interactions, low household income. Many educators have expressed concern over students who unexpectedly begin to struggle and appear to fall off track without apparent reason. A well implemented early warning system therefore can help educators identify students at risk of dropping out and assign and monitor interventions to keep them on track for graduation. Despite the popularity of early warning systems, research on their design and implementation is sparse. *Early Warning Systems and Targeted Interventions for Student Success in Online Courses* is a cutting edge research publication that examines current theoretical frameworks, research projects, and empirical studies related to the design, implementation, and evaluation of early warning systems and targeted interventions, and discusses their implications for policy and practice. Moreover, this book will review common challenges of early warning systems and dashboard design and will explore design principles and data visualization tools to make data more understandable and therefore more actionable.
