changes in wellbeing both positively and negatively within a framework of socio economic globalization instantaneous interconnectedness and rising environmental risks These clusters of progress comprise essentially the following seven areas bolstering peace and security respecting universal fundamental values satisfying personal and social basic needs expanding knowledge and managerial technological skills promoting arts and culture husbanding natural resources and protecting the environment and concerting actions for the global common good The term progress is used here to mean an all embracing sustainable advancement towards desirable goals be they material or non material offering higher levels of wellbeing to individuals and to society at large compared to previous or current conditions In unravelling the progress conundrum the author draws on his own original research and field work experiences which dovetail with those of other scholars by complementing their findings and or by offering different appraisals The author adopts an inter disciplinary approach that overcomes the silo like compartmentalization of fields of study The said approach enables us to reach a better understanding of the complex reality of progress or regression in various domains

Macroeconomics of Fiscal Policy Richard W. Kopcke, Geoffrey Matthew Bemis Tootell, Robert K. Triest, 2006 Leading academics and former policy makers assess the effectiveness of postwar American fiscal policy as questions about the role of fiscal policy once again come to the forefront of economic research and debate The United States s post World War II emphasis on activist fiscal policy for short term economic stabilization was called into question in the 1960s and by the late 1980s was superseded by the view that fiscal policy should focus on long run structural concerns For the past two decades both public policy and economic research emphasized monetary policy as a stabilization tool But there remain issues in American macroeconomic policy having to do with budget deficits present and projected as well as a recent revival of interest in fiscal policy as a stabilization tool Overall the academic pendulum is swinging back towards a renewed consideration of fiscal policy This volume brings together leading researchers and policy makers to assess the effectiveness and consequences of fiscal policy Drawing on postwar policy experience and recent economic research this book offers a state of the art consideration of where fiscal policy stands today Contributors address both the appropriateness of fiscal policy as a tool for short run macroeconomic stabilization and the longer term impact of fiscal decisions and economic policy Topics covered include the legacy of the Reagan administration s tax cuts whether public policy has encouraged such behavior as overconsumption which may foster persistent budget and trade deficits and in light of recent experience how and when fiscal policy might be appropriate as a short term stabilization tool Contributors Alan J Auerbach Susanto Basu Olivier J Blanchard Alan S Blinder Barry P Bosworth W Elliott Brownlee William H Buiter Jonathan Coppel Jean Philippe Cotis Luiz de Mello James S Duesenberry Douglas W Elmendorf Eric Engen Jeffrey A Frankel Benjamin M Friedman Richard W Kopcke Catherine L Mann Van Doorn Ooms Rudolph G Penner Alice M Rivlin Christopher A Sims C Eugene Steuerle Geoffrey M B Tootell Robert K Triest Edwin M Truman Economic and Social Survey of Asia and the Pacific United Nations. Economic and Social Commission for Asia and the Pacific, 2015 **Just Security in an Undergoverned World** William Durch, Joris Larik, Richard Ponzio, 2018-01-19 Just Security in an Undergoverned World examines how humankind can manage global problems to achieve both security and justice in an age of antithesis Global connectivity is increasing visibly and invisibly in trade finance culture and information helping to spur economic growth technological advance and greater understanding and freedom but global disconnects are growing as well Ubiquitous electronics rely on high value minerals scraped from the earth by miners kept poor by corruption and war People abandon burning states for the often indifferent welcome of

wealthier lands whose people in turn draw into themselves Humanity's very success underwritten in large part by lighting up gigatons of long buried carbon for 200 years now threatens humanity's future The global governance institutions established after World War II to manage global threats especially the twin scourges of war and poverty have expanded in reach and impact while paradoxically losing the political support of some of their wealthiest and most powerful members Their problems mimic those of their members in struggling to adapt to new problems and maintain trust in norms and public bodies This volume argues however that a properly mandated managed and modernized global architecture offers unparalleled potential to midwife solutions to intractable issues from violent conflict and climate change to poverty and pandemic disease that transcend borders and the capacities of individual actors It offers just security as a new framework for charing innovating solutions and strategies for effective and essential global governance

Bachelor Thesis from the year 2017 in the subject Business economics Accounting and Taxes grade 1.3 University of applied sciences Frankfurt a. M. FOM language English abstract The beginning of the digital revolution at the turn of the millennium has ushered in a structural change in many sectors Due to the increased use of modern information and communication technologies ICT several sectors have already experienced existential economic implications This is especially evident in the music media and publishing industries For example music is not only purchased on CDs from local retail stores but is also increasingly consumed via the Internet through streaming services such as Spotify Videos store rentals compete with the comfortable video on demand services available in customers own homes The Internet as a medium for information and consumption for products and services has established itself as a faster more comfortable and more efficient channel in comparison to traditional sales channels Stationary retail stores were also not spared from digital disruption The market research institute Gesellschaft für Konsumforschung GfK predicts a doubling of the online share of retail sales from currently to 20% by the year 2025 At the same time new and innovative market participants known as financial technology or FinTech companies are edging into the financial sector and trying to gain market share from established banks through customer friendly products and services Nevertheless the banks do not seem to recognize the seriousness of the situation and therefore are reluctant to adapt to the new situation However experience has shown that ignorance of an industry's digitization has already led to the fall of large and established companies As a well known example in the technology industry Kodak is often referred to in this context The company's reaction to the digital disruption took place too late whereas other companies had already recognized the trend towards digital photography at an earlier stage and prepared corresponding products As a result Kodak plummeted from the top of the photography technology industry Evidence of ongoing digital disruption of the financial services sector has already been provided in the form of a new type of bank the direct bank which was first introduced in the early 1990s FinTech companies seek to take advantage of this success and gain customers and
