## **Alternative And Bottom Up Peace Indicators:**

Alternative and bottom-up peace indicators Roger Mac Ginty, 2016-04-14 There is widespread dissatisfaction with the current suite of evaluation and monitoring tools available to peacebuilders and those responding to conflict Yet despite this dissatisfaction there are few concrete moves to investigate alternative methods of gauging the success or failure of peace initiatives This volume explores alternative methods of assessing peace These methods tend to be bottom up and people centric and are interested in many aspects of conflict societies that orthodox top down indicators often miss The methods explored in this work chime with the contemporary interest in critical approaches to peace and conflict studies and approaches that are interested in local perspectives The volume also connects with a growing interest in civic epistemology or the co production of data whereby research subjects participate in the research and have a chance of understanding the relevance of research All of the contributors to the volume have significant field experience in conflict affected areas and their work is informed by an engagement with the everyday challenges and opportunities facing people in war zones This book was published as a special issue of the Journal of Intervention and Statebuilding The Oxford Handbook of Peacebuilding, Statebuilding, and Peace Formation Oliver P. Richmond, Gözüm Visoka, 2021 Peacebuilding and statebuilding is one of the main approaches for preventing managing and mitigating global insecurities dealing with the humanitarian consequences of civil wars and expanding democracy and neoliberal economic regimes Peace formation is a relatively new concept addressing how local actors attempt to shape or work in parallel to international and national projects The Oxford Handbook of Peacebuilding Statebuilding and Peace Formation serves as an essential guide to this vast intellectual landscape It offers a systematic overview of conceptual foundations political implications and tensions at the global regional and local levels as well as key policies practices examples and discourses underlining all segments of peacebuilding and statebuilding

Locally Based Civil Conflict Transformation Between Partnership and Power Imbalance Samantha Ruppel, 2025-02-12 This book examines the processes and dynamics of cooperation between different actors in civil peace service projects in Kenya Sierra Leone and Liberia The joint handling of conflicts and peacebuilding challenges by local and international actors has a long tradition in German peace work and is becoming increasingly important in a globalized world Therefore the book explores the question relevant for both academia and peace practitioners to what extent an equal partnership can exist in the context of civil conflict transformation By focusing on the opportunities and challenges of cooperation the work succeeds in focusing on everyday activities analyzing the actual processes and frictions of peace work and making a valuable contribution to critical peace research and the discussion of hybridity and friction **Peace and Conflict 2016** David Backer, Ravinder Bhavnani, Paul Huth, 2016-06-10 An authoritative source of information on violent conflicts and peacebuilding processes around the world Peace and Conflict is an annual publication of the University of Maryland's Center for International Development and Conflict Management and the Graduate Institute of International and Development Studies Geneva The

contents of the 2016 edition are divided into three sections Global Patterns and Trends provides an overview of recent advances in scholarly research on various aspects of conflict and peace as well as chapters on armed conflict violence against civilians non state armed actors democracy and ethnic exclusion terrorism defense spending and arms production and procurement peace agreements state repression foreign aid and the results of the Peace Conflict Instability Ledger which ranks the status and progress of more than 160 countries based on their forecasted risk of future instability Special Feature spotlights work on measuring micro level welfare effects of exposure to conflict Profiles has been enlarged to survey developments in instances of civil wars peacekeeping missions and international criminal justice proceedings that were active around the world during 2014 Frequent visualizations of data in full color large format tables graphs and maps bring the analysis to life and amplify crucial developments in real world events and the latest findings in research The contributors include many leading scholars in the field from the US and Europe

**Reconciliation** Angelika Rettberg, Juan Esteban Ugarriza, 2023-03-01 HOW MUCH PROGRESS has Colombia made in terms of reconciliation after the agreement that put an end to the armed conflict between the state and the Fuerzas Armadas Revolucionarias de Colombia farc What can be done to promote peaceful coexistence based on social inclusion the acknowledgment of difference and institutional consolidation Reconciliation Experiences in Colombia and the World addresses these issues in contexts of transition from war to peace The book contributes perspectives based on the Colombian experience as well as on the experiences of other countries Some of its contributors analyze the usaid and acdi voca Reconciliation Barometer data All the authors seek to contribute to our understanding of the role of women in conflict and beyond the relationship between peace and justice and the nexus between reconciliation and trust

**Peacebuilding in Crisis** Tobias Debiel, Thomas Held, Ulrich Schneckener, 2016-01-29 The 1990s saw a constant increase in international peace missions predominantly led by the United Nations whose mandates were more and more extended to implement societal and political transformations in post conflict societies However in many cases these missions did not meet the high expectations and did not acquire a sufficient legitimacy on the local level Written by leading experts in the field this edited volume brings together liberal and post liberal approaches to peacebuilding Besides challenging dominant peacebuilding paradigms the book scrutinizes how far key concepts of post liberal peacebuilding offer sound categories and new perspectives to reframe peacebuilding research It thus moves beyond the liberal post liberal divide and systematically integrates further perspectives paving the way for a new era in peacebuilding research which is theory guided but also substantiated in the empirical analysis of peacebuilding practices This book will be essential reading for postgraduate students and scholar practitioners working in the field of peacebuilding By embedding the subject area into different research perspectives the book will also be relevant for scholars who come from related backgrounds such as democracy promotion transitional justice statebuilding conflict and development research and international relations in general

**Peace Figuration after International Intervention** Gëzim Visoka, 2016-07-01 This book examines the adverse

impacts of liberal peacebuilding in conflict affected societies It introduces peace figuration as a new analytical framework for studying the intentionality performativity and consequences of liberal peacebuilding The work challenges current theories and views and searches for alternative non conflicted research avenues that are suitable for understanding how peacebuilding intentions are made how different events shape peace outcomes and what are the consequences of peacebuilding interventions Drawing on detailed case studies of peacebuilding in Bosnia and Herzegovina Kosovo and Timor Leste the book argues that attempts to build peace often fail to achieve the intended outcomes A figurational view of peacebuilding interventions shows that post conflict societies experience multiple episodes of success and failure in an unpredictable trajectory This book develops a relational sociology of peacebuilding impact which is crucial for overcoming static measurement of peacebuilding successes or failures It shows that international interventions can shape peace but importantly not always in the shape they intended This book will be of much interest to students of statebuilding
