**Discography of the '80s (Fourth Edition)** Steve Binnie, 2018-11-05 SOUND OF THE CROWD A DISCOGRAPHY OF THE 80s is the ultimate record collector's guide to the 1980s. In the era of multi-formatting picture discs, coloured vinyl, multiple remixes, funny-shaped records and tiny CDs, you could lose down the back of the sofa. This book lists every format of every single EP and album released in the UK in the 1980s by over 140 of the decade's biggest acts, from ABBA to Paul Young. This fourth edition has been fully revised and expanded to include even more acts than ever before, with additional sections to cover Band Aid-style charity congregations and compilation albums from the early 80s K-Tel efforts through to the Now That's What I Call Music series and its competitors. Compiled by Steve Binnie, editor of the 80s music website Sound of the Crowd and writer, producer and co-host of the unconventional 80s chart show Off The Chart, broadcast weekly on Mad Wasp Radio.

**Close Reading for the Twenty-First Century** Dan Sinykin, Johanna Winant, 2025-10-21 A user's guide to the fundamental practice of literary studies, providing context, examples and practical exercises. Close reading, making an argument based in close attention to a text, is the foundation of literary studies. This book offers a guide to close reading, treating it as a skill that can be taught and practiced. It first explains what close reading is, what it does, and how it has been used across theoretical schools, ranging from affect studies to Black studies to queer theory to Marxism. It then presents a series of master classes in the practice, with original contributions by scholars from a range of different institutions. Finally, it provides practical materials, worksheets and suggested activities for instructors to use in the classroom. The tone throughout is encouraging and accessible, inviting readers of all backgrounds to hone their craft. The book divides the practice of close reading into five steps, coining a term for each step: scene setting, noticing, local claiming, regional argumentation and global theorizing. It traces the roots of close reading, showing how it has spread far beyond its origins in practical criticism and New

Criticism In twenty one short chapters contemporary scholars discuss close readings by such prominent literary critics as Erich Auerbach and Helen Vendler describing how their arguments work and how to achieve similar results An essential resource for instructors and students at the undergraduate level and beyond this book shows how understanding close reading can make us better readers thinkers and writers
