

# WHAT CAUSES AUDITORY PROCESSING DISORDER?

Like reduced hearing sensitivity, auditory processing disorder (APD) has many possible causes. These are a few risk factors and likely causes for APD that have been documented in research.

01

## GENETICS

APD can run in families. Sometimes parents discover that they have APD after their child has been identified.

02

## CHRONIC EAR INFECTIONS

Incomplete auditory access due to chronic ear infections increase the likelihood of a person developing APD.

03

## NEUROLOGICAL CONDITIONS

Meningitis, multiple sclerosis, epilepsy, brain injuries, exposure to chemicals that are toxic to the brain, and strokes can lead to

the diagnosis and treatment of pediatric hearing and balance disorders give students practical information they need and help practitioners accurately evaluate patients Graduate students in audiology will read this text cover to cover and practicing audiologists will frequently refer to it in their daily practice *Language Processing Problems* Cindy Gaulin, 2001-10-24 Language Processing Problems A Guide for Parents and Teachers is an easy to read but thorough treatment of a problem which is quite prevalent but often overlooked Children and adults vary in their language processing capacities Recognizing this variation can be very useful in understanding why certain children are having unexpected difficulties with school or social interactions Split second delays in recognizing words problems remembering what was said difficulties finding the word needed or organizing a complex sentence can all interfere with communication For some children these problems are quite significant in spite of perfectly adequate or even exceptional knowledge of words and grammatical rules The book explains in laymans terms how people use language to communicate the components of the language processing system and the types of problems that can arise with its use In particular an attempt is made to discriminate between language processing problems and other disorders such as Attention Deficit Disorder ADD Central Auditory Processing Disorder CAPD Specific Language Impairment SLI and Dyslexia Guidelines are provided for recognizing language processing problems and for deciding how to proceed toward a solution The book ends with many suggestions which parents teachers and children can use to address specific and general language processing problems A quick pass through the book finds that it begins with several examples of children who have language processing problems It then provides down to earth descriptions of what language processing is and how we use speech to communicate This is followed by discussions of the difference between language knowledge and language processing and other psycholinguistic topics such as word recognition and working memory Distinctions are drawn between input and output processing and between auditory and visual language processing These topics are followed by a chapter about how children learn to process language After this introduction to the workings of language processing problems with language processing are treated in detail What are the problems Who has them And what causes language processing problems Confusions of terminology are dealt with and then come two chapters which lay out the intrinsic genetic and extrinsic environmental factors related to language processing problems In these chapters I compare and integrate information about related problems which can co occur or be confused with language processing problems The next two long chapters help parents and teachers recognize whether a child has a language processing problem and then decide what to do about it The first of these chapters is divided into sections dealing with preschoolers school age children and high school students The second chapter helps parents and teachers decide whether a speech language evaluation is needed what that evaluation should include and details various possible treatment routes There are four chapters which provide suggestions for improving listening and following directions verbal memory word retrieval and organization of language output respectively In each chapter there are suggestions for

external strategies to be used by parents and teachers and internal strategies to be used by the child as well as descriptions of the kinds of treatment available from speech language pathologists for these problems A short final summary is followed by a glossary and references *Don't You Get It? Living with Auditory Learning Disabilities* Harvey Edell, Jay R.

Lucker, Loraine Alderman, 2012-10-03 Auditory Processing Disorder APD affects as many as 5 percent of children It has been called a hidden disability because it is often mistaken for everything from odd behavior and deafness to other disorders such as ADHD or sometimes even autism It is none of those things It is a processing problem considered a learning disability where the child or adult is unable to integrate information that is spoken to them It can be a very debilitating disorder affecting the child in many aspects of life from academics to peer relationships And many children and adults have the disorder and don't even realize Don't You Get It Living With Auditory Learning Disabilities A Guide for Parents and Professionals was written by three experts in the field led by educator and speech language pathologist Dr Jay Lucker along with Dr Loraine Alderman a school psychologist and Harvey Edell a former teacher And all three co authors have APD The book is filled with important information about the disorder but even more so it gives several real life accounts on how APD actually manifests itself The book also addresses the inherited nature of APD through the intergenerational stories by Edell his daughter Alderman and Alderman's teenage son Andrew This is an important book to read if your child often asks What or just doesn't seem to get it And Lucker is one of the most respected sources when it comes to this disorder so you shouldn't pass up any opportunity to read what he has to say Ever realize that you or someone you know does not recognize subtle differences between sounds in words even though the sounds themselves are loud and clear For example the request Tell me how a chair and a couch are alike may sound like Tell me how a hair and a cow are alike Or how the constant low tapping or clicking noise can drown out the hearing of a louder conversation causing certain words not to be heard These kinds of problems are experienced day in and day out by people suffering from a learning disability known as Auditory Processing Disorder APD It is not that the person with APD is not paying attention as many people assume it is in fact that they are in a noisy environment or listening to complex information Don't You Get It is a unique comprehensive book written by people who have had to live with APD and learn how to learn grow and survive daily with it People with Auditory Processing difficulty typically have normal hearing and intelligence However they have also been observed to Have trouble paying attention to any information presented orally Have problems carrying out multi step directions Need more time to process information Have problems with their relationships or peers Have difficulty with vocabulary reading comprehension spelling and understanding language or directional tasks Mimic symptoms of Attention Deficit Disorder causing misdiagnosis and incorrect treatment Don't You Get It specifically looks at people over three generations of the same family and others as well who have lived with APD It demonstrates the struggles that these people went through and shows how they worked and overcame their problems in communicating and learning If you or anyone you know has even a mild case of an Auditory
