Maths Meets Myths: Quantitative Approaches to Ancient Narratives Ralph Kenna,Máirín MacCarron,Pádraig MacCarron,2016-09-22 With an emphasis on exploring measurable aspects of ancient narratives *Maths Meets Myths* sets out to investigate age old material with new techniques. This book collects for the first time novel quantitative approaches to studying sources from the past such as chronicles, epics, folktales and myths. It contributes significantly to recent efforts in bringing together natural scientists and humanities scholars in investigations aimed at achieving greater understanding of our cultural inheritance. Accordingly each contribution reports on a modern quantitative approach applicable to narrative sources from the past or describes those which would be amenable to such treatment and why they are important. This volume is a unique state of the art compendium on an emerging research field which also addresses anyone with interests in quantitative approaches to humanities. *Begumbagh* George Manville Fenn,1879

Ages of Woman, Ages of Man Merry Wiesner Hanks,Monica Chojnacka,2014-06-11 The collection is organized around two main principles: stages of life and gender and is divided into eight chapters: childhood, youth and sexuality, courtship and weddings, married life, economic life, networks and communities, and widowhood and old age. The sources address the numerous and varied ways in which women and men's notions of themselves affected their lives and explore how accepted norms of masculine and feminine behaviour influenced social, economic and religious change. Guided by a general editors' introduction and then an introduction to each chapter, the user will find this an invaluable reference companion to early modern gender history. **Begumbagh, a tale of the Indian mutiny, and other stories** Begumbagh,1879 *Fancy*
