**Youthquakes and Aftershocks** James Sloam, Matt Henn, Ana Isabel Nunes, 2026-01-01 This book investigates key trends in youth political participation in the UK Europe and the United States since the turn of the century with a focus on the UK General Election and the US Presidential Election that were both held in 2024 It explores the reasons why many young people seem to have become disillusioned with electoral politics in the aftermath of recent youthquake elections such as the 2017 UK General Election with their overwhelming support for the Labour Party and both the 2008 and 2020 US presidential elections in support of Obama and Biden We attribute their disenchantment to failures of public policy that seem to increasingly favour older generations and of communication resulting in political parties' inability to effectively connect with young people on issues that they prioritise and that have meaning for their everyday lives The book shows how this led to lower turnouts in 2024 in both the UK and the USA and highlights the very low rates of participation amongst youth from lower socio economic groups This is potentially dangerous for democracy if young people continue to feel let down by parties and to abstain from voting it is likely to lead to more reactive public policy and to increases in the attraction of populist or extremist parties and candidates to young people The book emphasises the need for mainstream parties and candidates to provide a more meaningful youth offer and to mobilise young people through horizontal forms of communication From a young person's perspective the book also shows how citizenship education can play an important role in resisting populism and disinformation and in rejuvenating democracy

geopolitics war speed technology and control are viewed as some of the most challenging and disturbing interventions on the politics of security in the twenty first century interventions that help us understand a world that confronts problems that increasingly emerge from the desire to make life safer faster networked and more efficient Security Technology and Global Politics examines some of the key concepts and concerns in Virilio s writings on security society and technology endo colonization fear and the war on terror cities and panic cinema and war ecological security and integral accidents universities and ideas of progress Critics often point to an apocalyptic or fatalistic element to Virilio s writings on global politics but this book challenges this apocalyptic reading of Virilio s work suggesting that while he doesn t provide us with easy solutions to the problems we face the political force in Virilio s work comes from the questions he leaves us with about speed security and global politics in times of crisis terror and fear This book will be of interest to students of critical security studies political theory sociology political geography cultural studies and IR in general **Ross Macdonald/Kenneth**

**Relating to a Model of the Crust and Mantle** Paul Lieber,David Braslau,1965 A layered half space is presented as a model for the crust mantle system of the earth Elastic and inelastic properties are attributed to both media The primary purpose of this report is to study time sequences of shallow earthquakes with special consideration of the material properties of the crust and mantle The earthquake mechanism is modelled after the San Andreas Fault in California and is considered as

a discrete Volterra type dislocation A three dimensional boundary value problem in static linear elasticity where the material is assumed to be incompressible is solved by means of a modified form of the Galerkin vector and use of double Fourier transforms The solution is shown to reduce to the classical one obtained for the half space Time dependent properties are introduced into the system by means of Biot's correspondence principle of linear viscoelasticity Solutions are obtained in quadrature for the surface displacements and some stresses at the interface A brief discussion of postglacial uplift and its relation to the inelastic properties of the system is included Experiments and observations which may be needed for numerical calculations are suggested Author Small Press Record of Books in Print Len Fulton,1993 America's New Democracy Morris P.
