## Electric parking brake

## Manual application/release

The parking brake can be applied manually by pulling the control lever A.

When the ignition is on, the parking brake can be released manually by pressing the brake pedal and pulling then releasing the control lever A.

If you get out of your vehicle with the hybrid system active, apply the parking brake manually.

Never leave a child alone in the vehicle with the ignition on; they could release the parking brake.

## Automatic application/release

Press the accelerator, the parking brake is released automatically and progressively on acceleration.

When the ignition is switched off, (Ready lamp off) the parking brake is applied automatically.

If this warning lamp is on in the instrument panel, the automatic application/release are deactivated.

Before getting out of the vehicle, check that the braking warning lamp (red !) and the warning lamp P are on (not flashing).

If you are towing a trailer or if the slope could alter (transport by ship, lorry, recovery of the vehicle, ...), make a manual maximum application of the parking brake (long pull on the control lever A) to immobilise the vehicle.
