

Installation Guidelines

Congratulations on choosing ALPINE PLUS for your flooring.

Please read all instructions before you begin an improper installation will void warranty. When properly installed and cared for your new flooring will be sure its investment will look great for years.

Please ensure the floor is smooth to within 3mm over 3m per AS/NZS 3570.1-2013 code standards.

BEFORE YOU START

- Plan for subflooring expansion joints around the perimeter of the room - or any area that is less than 3m x 3m, you may need to fit a 10mm gap at the meeting floor junction. Please refer to the AS/NZS 3570.1-2013 code.
- Lay the subflooring planks on the subfloor, in individual planks off the plain floor in accordance with 'Control requirements'.
- If necessary, or desired, an Alpine plus floor should be used. This requires gaps of 10mm to be used, a compensating allowance can be used with a minimum gap of 5mm, a gap of 10mm is the preferred method.
- Ensure the room temperature does not exceed the allowable temperature range of between 15 to 30 degrees Celsius.

TOOLS AND MATERIALS NEEDED

- Tape Measure
- String Line
- Straight Edge
- Utility Knife
- Pencil
- Spacers - esp. 5mm spacers
- Gloves
- Rubber Mallet
- Compound Adhesive, esp. Mastic/Gum
- Alpine Plus. Spacers should be used in front of walls, doors or high curbs that allow for the required 10mm expansion.

INSTALLATION PROCESS

- Before commencing laying, take time to plan the installation from start to finish for the best results.
- Place full planks on the floor of greatest traffic flow and take into the least used areas.
- Ensure accurate, straight lines parallel to the direction of traffic.
- Consider the placement of expansion joints, should the room exceed 30m in any direction, then factor under 'Expansion joints'.
- Once your lines of layout, expansion, joints, including compound curves, are marked.
- Ensure the floor is level, clean and structurally sound otherwise the floor will fail.
- Using string lines, repeat up to corner along the length and width of your room to starting point.
- Measure the room you plan to cover, and adjust your starting point or set the first planks so you don't end up requiring lengths less than 300mm plus from floor to ceiling.
- Ensure planks are laid for expansion and contraction.
- Alpine Plus can be installed on a floating method however without sunlight and heavy temperature peaks its stronger, your new required to adhere the floating using an acrylic/EPDM adhesive.
- Consider the use of adhesive compound to lay.
- When installing, or re-installing the floating board, use the Alpine Plus floating, a minimum gap of 1 to 1.5mm is required between the floating board and the subfloor of the room. This gap must remain open to allow for expansion and contraction with changes in your floor, maximum of the use of a 1.5mm spacer to maintain the expansion.
- Once laid should be checked for any float and warped areas. Apply to any contraction or other resulting areas with compound.
