developing good mining views find little how to information And are you like most analysts preparing the data in SAS This book is intended to fill this gap as your source of practical recipes It introduces a framework for the process of data preparation for data mining and presents the detailed implementation of each step in SAS In addition business applications of data mining modeling require you to deal with a large number of variables typically hundreds if not thousands Therefore the book devotes several chapters to the methods of data transformation and variable selection A complete framework for the data preparation process including implementation details for each step The complete SAS implementation code which is readily usable by professional analysts and data miners A unique and comprehensive approach for the treatment of missing values optimal binning and cardinality reduction Assumes minimal proficiency in SAS and includes a quick start chapter on writing SAS macros   DW 2.0: The Architecture for the Next Generation of Data Warehousing W.H. Inmon,Derek Strauss,Genia Neushloss,2010-07-28 DW 2 0 The Architecture for the Next Generation of Data Warehousing is the first book on the new generation of data warehouse architecture DW 2 0 by the father of the data warehouse The book describes the future of data warehousing that is technologically possible today at both an architectural level and technology level The perspective of the book is from the top down looking at the overall architecture and then delving into the issues underlying the components This allows people who are building or using a data warehouse to see what lies ahead and determine what new technology to buy how to plan extensions to the data warehouse what can be salvaged from the current system and how to justify the expense at the most practical level This book gives experienced data warehouse professionals everything they need in order to implement the new generation DW 2 0 It is designed for professionals in the IT organization including data architects DBAs systems design and development professionals as well as data warehouse and knowledge management professionals First book on the new generation of data warehouse architecture DW 2 0 Written by the father of the data warehouse Bill Inmon a columnist and newsletter editor of The Bill Inmon Channel on the Business Intelligence Network Long overdue comprehensive coverage of the implementation of technology and tools that enable the new generation of the DW metadata temporal data ETL unstructured data and data quality control   **Principles of Transaction Processing** Philip A.
