Food Technology , 1954-07 **Applied Olfactory Cognition** Gesualdo M Zucco, Benoist Schaal, Mats Olsson, Ilona Croy, 2014-12-02 Foreword by Richard J Stevenson Macquarie University Australia It was long thought that the human nose might be able to discriminate somewhere in the order of 10 000 different odourants The recent finding that the human nose can discriminate something like a trillion different smells serves as yet another reminder that we have again underestimated the capacity of our sense of smell Bushdid Magnasco Vosshall Keller 2014 This volume serves as a further corrective for anyone who should hold the view that olfaction

is unimportant in human affairs The papers presented in this ebook carefully collated and overseen by Aldo Zucco Benoit Schaal Mats Olsson and Ilona Croy showcase a large number of quite different reasons for studying the applied side of olfaction and indeed human olfaction in general The 23 contributions presented here cover a broad range of topics which illustrate contemporary interests in our field Although with a strong applied focus a noteworthy feature of this ebook is the richness of the theoretical perspectives that are developed These range from considerations of olfactory perception memory expertise and priming right the way through to receptor genetics These contributions from many leading experts in the field will surely shape much of the applied work linking olfaction to disease which is a further focus of this ebook In respect to health and disease the chapters on aging pregnancy depression alcohol dependency and environmental odours present overviews and rich new data on many contemporary problems to which the study of olfaction is now contributing A particularly notable aspect of olfactory experience is the affective impact that odours can have on people and their lives The ebook covers some particularly intriguing aspects of work in this area with empirical studies investigating dissociations between wanting and liking stress reduction in the elderly mother infant bonding and the emotions that different odourants can evoke This affective line of work is nicely complemented by empirical studies on expertise the effect of odours on visual attention and the relationship between particular personality traits and interest in olfaction The gradual appropriation of methods from cognitive neuroscience into olfaction is also nicely represented in this ebook with at least three of the chapters reporting data using neuroimaging including a particular intriguing study looking at recognition of odours in mixtures Finally the close links between olfactory perception and sensory evaluation are also reflected in a chapter on wine I hope that readers of this e book will be struck as I have been in reading its various chapters how much olfaction affects our lives and how the study of this sense can enrich it References Bushdid C Magnasco M Vosshall L Keller A 2014 Humans can discriminate more than 1 trillion olfactory stimuli *Science* 343 1370 1372

Stuetz,A. Boon,2000-05-31 The release of unpleasant odours during wastewater and sludge treatment and disposal is not new However in recent years the level of complaints concerning the release of these offensive odours has increased This is in part a direct result of the encroachment of housing on lands surrounding existing wastewater and sludge treatment works together with the raised awareness of the public over its rights related to environmental issues To avoid the creation of nuisance odours in wastewater and sludge treatment requires an understanding of those processes that are responsible Odours that are formed within wastewater and sludge will not create an odour nuisance until they are released into the atmosphere It is therefore important to understand the mechanisms by which odours are formed and then released and dispersed in order to provide effective control systems The CIWEM IAWQ odour conference enabled practitioners regulators and researchers to present findings on a wide range of topics relating to the control and prevention of odours Twenty two papers have been selected for these proceedings They examine the regulation of odour emissions techniques used to measure and model odour emissions and treatment technologies used to control and prevent odour formation and emission **Smell and Taste** Richard L.
