Key Concepts:  
Teaching Critical  
Thinking is Needed

Application of  
Critical Thinking

## Notes and Questions

### The Need to Teach Critical Thinking

-critical thinking skills usually don't develop on their own

### An Example

- \* visual-spatial skills - the ability to visually perceive 2 or more objects in relation to each other and to yourself
  - \* men performed better in certain tasks and women in others because of hunter/gatherer history
  - \* is this considered definite or an assumption?
  - \* now, one should be asking:
    - \* is there more information?
    - \* are there alternative explanations?
    - \* is there contradictory evidence?
- \* when finding contradictory evidence, one should say the given explanation is weakened, not completely wrong

### Summary:

Critical thinking is complex thought processing that ultimately results in a higher probability of a desired outcome. Critical thinkers essentially a lot of the why and the why: "why does this happen?" "how do you know?" "what strengthens/weaken this?" "and the what"
