

7th Grade Argumentative Essay Example

Topic: Student/Youth Environmental Activism

Issues like climate change, the loss of biodiversity, and deforestation are wreaking havoc on the world. According to a letter written for *The Guardian* by youth climate activists, humans are in the middle of the "sixth mass extinction of species" on our planet. Some students are taking action by skipping school to protest and strike for climate and the environment. However, in my opinion, students should not be environmental activists.

To begin, students should not be environmental activists because it keeps them from learning essential information in school. First of all, according to the *Newsweek* article, "Young People Urged . . .," students from "more than 150 students skipped school" to participate in "another series of worldwide protests." Even though protesting seems like a good way to bring awareness to the issues the world is experiencing with climate, students should not be giving up their time in school. Secondly, University of the People states that "[s]ocieties with higher . . . levels of education tend to be healthier, have higher rates of economic stability, lower crime, and greater equality" ("Benefits of Education Are Societal and Personal"). This shows that school is essential to a thriving society. Without the time in school to learn important and basic skills, youth protesters are just creating a swarm of uneducated and uninformed students who will not be able to clearly explain their cause. And, society will suffer, because of the lack of fully educated members.

Also, students should not be environmental activists because at this point, it is too late to reverse the effects of climate change, so activist efforts are pointless. To begin, in the article, "...Top 5 Environmental Concerns. . ." it states that a "recent United Nations report" said that if we don't make revolutionary changes in human behavior, the "planet will suffer dramatically from global warming in just 12 years." This proves that we really do not have enough time to change the fate of humanity. With most people being selfish and stuck in the ways of instant gratification and greed, it would take a lot longer than a decade to change the minds and behaviors of people on Earth. Additionally, George Marshall, in his book *Don't Even Think About It*, "draws on a wide range of social science research to explain why we, as a species, would prefer not to think about climate change, its implications, or what our response to it should be" ("A Climate of Mind"). This proves that humans are biologically programmed to not be concerned for the future of our climate. People are concerned about living for now. There is no changing their minds—by persuasion or even science.

On the other side, some people believe that students should be taking action and skipping school to protest and strike. In a letter youth climate activists wrote for *The Guardian*, they said "We have the right to live our dreams and hopes. . .we can and will stop this madness. . .we, the young people, will
