Bicudo, Bronislaw Czarnocha, Maurício Rosa, Małgorzata Marciniak, 2023-09-30 Ongoing Advancements in Philosophy of  
Mathematics Education approaches the philosophy of mathematics education in a forward movement, analyzing, reflecting,  
and proposing significant contemporary themes in the field of mathematics education. The theme that gives life to the book is  
philosophy of mathematics education, understood as arising from the intertwining between philosophy of mathematics and  
philosophy of education, which through constant analytical and reflective work regarding teaching and learning practices in  
mathematics is materialized in its own discipline, philosophy of mathematics education. This is the field of investigation of the  
chapters in the book. The chapters are written by an international cohort of authors from a variety of countries, regions, and  
continents. Some of these authors work with philosophical and psychological foundations traditionally accepted by Western  
civilization. Others expose theoretical foundations based on a new vision and comprising innovative approaches to historical  
and present day issues in educational philosophy. The final third of the book is devoted to these unique and innovative  
research stances towards important and change-resistant societal topics such as racism, technology gaps, or the promotion of  
creativity in the field of mathematics education
