Routledge Handbook of Consumer Protection and Behaviour in Energy Markets Tina Soliman Hunter, Marcin Kraśniewski, Jurgita Malinauskaite, Marzena Czarnecka, 2024-09-27 The Routledge Handbook of Consumer Protection and Behaviour in Energy Markets provides a comprehensive study of consumer protection and consumer behaviour in selected jurisdictions worldwide. Each chapter is written by experts and provides a contemporary overview of national consumer protection and policy developments in the energy sector. Today energy has become an essential factor in ensuring the socio-economic development of any country and improving the quality of life of society and is now an essential element of life for everyone. The energy market has become a competitive market based on the assumption that generation and sale of energy is not a natural monopoly and that market mechanisms in particular competition between energy companies are the best way to reduce prices and improve customer service. The purchase of energy is inextricably linked with its distribution from the producer to the purchaser. The book shows that well functioning energy markets need informed and well protected consumers who can benefit from competition and transparent offers. They are free to choose the most competitive providers and know their rights with access to effective means of redress. Given that the energy market has a specific technical nature the book analyses the energy market within the scope of free market principles with a focus on the protection of the weaker party to the contract the consumer. In addition consumers can also play an active part of the clean energy transition.

By exploring boundaries and breaking points it will assist people to understand the law when things go wrong from negligence to judicial review and from contract to product safety legislation.
