## Aha Manual Code:

**HIPAA standards dual code sets are acceptable for reporting medical procedures.** ,2002 Medical care involves the provision of a myriad of health related services from the diagnosis of medical condition to its treatment A means to consistently classify define and distinguish among these and other health related services is critical for reimbursing providers and analyzing health care utilization outcomes and cost Codes serve this role by assigning each distinct service a unique identifier Health care providers such as hospitals and physicians report medical conditions and the health related services they have provided to patients on medical records which are in turn transcribed into corresponding codes by coding professionals These codes are then reported on claims forms and submitted to both public and private payers for payment In addition to their use in these financial and administrative transactions codes facilitate the analysis of data that are used in monitoring resource utilization and cost measuring the quality safety and efficacy of care analyzing outcomes of treatment options and identifying fraud and abuse Until recently there was wide variability in requirements for coding health related services such as procedures diagnoses medical devices supplies and prescription drugs For example coding requirements could vary from payer to payer making the filing of claims with multiple payers administratively burdensome for providers In addition this wide variability in coding made it difficult to electronically transmit standardized health related information and compromised the reliability of health related data In enacting the Health Insurance Portability and Accountability Act of 1996 HIPAA the Congress sought to simplify data reporting and claims processing requirements across all providers and payers and facilitate the electronic transmission of health related information 1

Abbey, 2008-04-02 While the vast majority of providers never intend to commit fraud or file false claims complex procedures changing regulations and evolving technology make it nearly impossible to avoid billing errors For example if you play by HIPAA's rules a physician is a provider however Medicare requires that the same physician must be referred to as a supplier Even more troubling is the need to alter claims to meet specific requirements that may conflict with national standards Far from being a benign issue differing guidelines can lead to false claims with financial and even criminal implications *Compliance for Coding Billing Reimbursement Second Edition A Systematic Approach to Developing a Comprehensive Program* provides an organized way to deal with the complex coding billing and reimbursement CBR processes that seem to force providers to choose between being paid and being compliant Fully revised to account for recent changes and evolving terminology this unique and accessible resource covers statutorily based programs and contract based relationships as well as ways to efficiently handle those situations that do not involve formal relationships Based on 25 years of direct client consultation and drawing on teaching techniques developed in highly successful workshops Duane Abbey offers a logical approach to CBR compliance Designed to facilitate efficient reimbursements that don't run afoul of laws and regulations this resource Addresses the seven key elements promulgated by the OIG for any compliance program Discusses numerous types of compliance issues for all type of healthcare providers Offers access to online resources that provide continually updated information Cuts through the morass of terminology and acronyms with a comprehensive glossary Includes a CD ROM packed with regulations and information In addition to offering salient information illustrated by case studies Dr Abbey provides healthcare providers and administrators as well as consultants and attorneys with the mindset and attitude required to meet this very real challenge
