Aircrew Survival Guide:

Aircrew Survival Essentials Chris Sharpe, 2020-05-15 This range of theatre specific aircrew survival manuals follow on from the original book HEMS Helicopter Essentials a survival manual that is totally different and hopefully like no other In an ideal world if you follow the first half of that manual you should not need the second part The aim of these smaller manuals is to alleviate the all too common generic survival skills that are found in many textbooks Each area of the planet is wonderful but vastly different As aircrew we can find ourselves over a multitude of environments during a routine flight so rather than overload our knowledge if we keep to the basic principles of survival and a few basic regional specific items Just the Essentials that will keep you alive **Survival Guide for Downed Air Personnel** David Powers, 2017-04-26 Aircrew Survival was published in 1985 by the United States Air Force to assist downed pilots and other crewmembers in surviving a downed aircraft incident Wouldn't you hate to be the person that survived a plane crash only to die from hypothermia starvation or being eaten alive by a pack of wild dogs This guide was published as a tool to educate aircrew but it serves as a valuable and handy resource for anyone who wants to learn survival methods from finding food to evading the enemy to the importance of spiritual health **U.S. Air Force Survival Handbook** United States Air Force, 2017-01-17 Ideal for fans of History Alive United States books Survivalist handbook with pieces of Air Force history Essential piece of any aircraft survival kit This Air Force handbook was written to help pilots who find themselves in hostile environments While it is designed for use in formal Air Force training it is also useful for the general reader seeking a comprehensive and complete manual of outdoor survival techniques Any US Army survival kit would also benefit from this handbook Among other pieces of professional and expert advice the US Air Force Survival Handbook tells readers about Finding your way without a map First aid for illness and injury Finding food and water Building a fire Concealment techniques Using ropes and tying knots Survival at sea Signaling for help Animal tracking Predicting the weather Building shelters Released on the 70th anniversary of the US Air Force this book outlines specific survival threats found in many different types of terrain and how to survive them It is invaluable to all who enjoy the outdoors and anyone who seeks insight into the training tactics of the US Air Force *Aircrew Survival* United States Government Printing Office, United States.
