Before installing Your Cable Modem

Your cable service provider wants to know your modem's MAC ADDRESS, which is a unique ID label on the bottom of your modem. This information identifies your cable modem service or Cable Modem/Router information by linking the cable company (ISP/IS) to the specific modem. Because this ID label is provided by the cable modem's manufacturer, it is a **MAC** address. If you need the modem's serial number, you can find it from the MAC address on the modem label.

System Requirements

- The modem/Router will connect to a cable modem service that uses one of the popular DOCSIS standards - DOCSIS 1.1, 2.0, or 3.1. If you need to get cable modem service, please speak with your cable service provider.
- To use the Quick Start, you need a computer, an iPod™, or another tablet.

If your cable service provider provided a cable modem starter kit, please confirm cable. Your start kit or starter kit is to use the cable modem starter kit from your service provider, go to Step 6 to connect to a computer if you don't have or otherwise go to a cable modem starter kit.

If your cable service provider provided a cable modem starter kit

Some cable service providers supply a cable modem starter kit that includes cable that you may need (see your cable modem). The kit may include a remote control for controlling the modem's web page and your cable features. (The cable service provider or your cable service provider's technical support technicians, among other things, is the cable service. If you receive a kit that includes a remote control, you need the kit's remote control and confirm it includes the cable modem/Router. The modem is DOCSIS 1.1, 2.0, or 3.1, and connects to a normal cable modem.)

You should be able to connect to your cable modem service using a cable modem and then connect to a computer using the provided Ethernet cable or the modem before (see using the Cable Modem/Router to Wire a Wireless Connection).

Note: Please refer to the Hardware Connection section. Your modem will be in a stage of the last of the cable modem with description of the connection.

After you have installed your cable modem with the provided cable and other cable network, your cable modem will connect your computer to the Internet.
