*The Supreme Court of Ghana Law Reports*, 2015      *Journal of Linguistics*, 2015      **Influences on the Price of Bitcoin** Alisha Dhiri, 2018-07-19 Master's Thesis from the year 2017 in the subject Economics Finance grade 4 5 Lucerne University of Applied Sciences and Arts Institute of Finance course Banking and Finance language English abstract Digital currencies are a critical part of the digitization process Along with gaining momentum with investors digital currencies are being prominently covered by the media Bitcoin in particular has reached multiple peaks within the previous few years while showing a continuous upward trend in value The research conducted in this paper aims to uncover the major influencers of the value of bitcoin An approach using micro economic and macroeconomic models is used to categorize bitcoin as commodity or currency Furthermore five major digital currencies are also analyzed for correlation with the value of bitcoin and analysis of volatility in the exchange rates Based on the evaluation criteria it is found that bitcoin can be classified as commodity more than currency due to high influence of supply and demand rather than macroeconomic factors Also it can be concluded that the price of bitcoin is highly correlated with the digital currency Monero while the other currencies analyzed show a small to medium correlation based on the Pearson correlation coefficient The paper also analyzes major changes in the historical timeline of bitcoin by the way of qualitative analysis of major events that may have caused volatility In conclusion a future outlook is provided which outlines upcoming changes per the author's opinion      Report to the Governor and General Assembly Illinois. Department of Children and Family Services. Office of Inspector General, 2015      A new step to the European Integration. The Association Agreement between the EU and Ukraine Yevgeniya Kozmenko, 2016-07-26 Diploma Thesis from the year 2015 in the subject Economics International Economic Relations grade 1 3 University of Leipzig language English abstract The Association Agreement which was signed between the European Union and Ukraine in 2014 opened a big discussion about new challenges in Europe Many European countries signed similar Agreements and became very quickly thereafter full members of the EU Nowadays there are a lot of opinions and myths about what exactly the Ukrainian Association is and in general where it should bring Ukraine and Europe This research paper explores the objectives pursued by the EU and Ukraine by the time they signed the Agreement It provides a full analysis and interpretation of its content and describes how Ukrainian attempt to get closer to the European Union changed the geo political situation in Europe This paper is important as it will cast in light the background of the present tragical events in Ukraine and will provide deeper knowledge about the situation The main hypotheses of this work are as follows 1 The Association Agreement between Ukraine and the EU does not give any guarantees for the accession to the EU and could only be seen as the basis of a prospective future membership 2 The access to the European integration of Ukraine in the EaP is precluded because of inflexible and naive policy of the EU The ENP has failed and needs to be reconsidered 3 Russian permanent intervention in the policy decision making of Ukraine slowdowns its integration towards Western Europe The paper will be a mixture of description and data followed by analysis going gradually more in depth from the negotiation

process to the conclusion of the AA between Ukraine and the EU To make the argument easy to follow chronological analysis will be used in dealing with the interval of 2007 2015 from the beginning of negotiations to the implementation process of the AA     Annual Report - Indian Council of Social Science Research Indian Council of Social Science Research,2013

Introduction to Information Systems R. Kelly Rainer,Brad Prince,2020-06-11 Introduction to Information Systems 8th Edition teaches undergraduate business majors how to use information technology to master their current or future jobs Students develop a working understanding of information systems and information technology and learn how to apply concepts to successfully facilitate business processes This program demonstrates that IT is the backbone of any business whether a student is majoring in accounting finance marketing human resources production operations management or MIS
