Chaganti,Hugh D. Sherman,1998-08-27 The ability to implement change quickly is crucial to an organizations s success not only in traditionally sedate industries but also in today s fast moving hi tech ones Sherman and Chaganti from their study of 100 American corporations half in stable industries half in volatile ones find that a firm s structure of governance bears heavily on the speed with which the firm can reorient itself What are the characteristics of firms that change quickly What inhibits others And what precisely is the impact of a firm s stockholders board and top management on its ability to adapt Sherman and Chaganti provide answers to these and other questions in the first book yet to focus entirely on the determinants of time in corporate reorientations In order for a firm to develop or sustain a competitive advantage it must not only adapt correctly to environmental change but also adapt quickly This study examines the factors associated with the time a firm takes to initiate reorientation The results of the research indicate that even in relatively large organizations reorientations are not rare and occur routinely Further deterioration of a firm s financial condition tends to hasten its initiation of reorientation However the determinants of time taken to initiate reorientation differ in firms with relatively high prior performance and firms with relatively low prior performance A Collection of Technical Papers ,1965 **Annual Report** O.--CITY AUDITOR TOLEDO,Toledo (Ohio).
