Palik, Philippe Nolet, 2025-02-11 Forest Assisted Migration FAM seeks to sustain ecosystem function in managed forests by
introducing tree species or genotypes better adapted to changing climates Operational FAM requires trials in managed
forests and research e g modeling experiments and examining the economic social and ecological implications to assess the
practice Climate change will undeniably impact tree species geographic ranges the composition and diversity of forest
ecosystems and the services they provide However the natural processes of migration and adaptation may lag the pace of
climate change Forest managers can adopt adaptable practices like forest assisted migration to mitigate the impact This
involves intentionally relocating seed sources and implementing silvicultural practices that increase forests adaptive capacity
Adaptive capacity refers to a forested system s ability to adjust to changing environmental conditions Conducting
multidisciplinary research on these forests is crucial to developing sustainable management strategies and ensuring
