

FIGURE 14.12

Block diagram to be completed for Problem 3.

- (5) Label the hanging wall and footwall on the top and side faces.
 - (6) With Side 1 up, number the beds in order of age, with 1 the oldest. Are the beds at the surface of the upthrown block generally older or younger than those at the surface of the downthrown block? Why?
 - (7) What kind of fault is this?
3. Figure 14.12 is a block diagram showing a fault and a number of folds. The front face of this diagram is perpendicular to the strike of these features, so you can easily measure the dip of the fault and bedding planes where indicated. North is into the page, west and east are marked.
- a. Use a protractor to measure the dip angles along a single fold at points 1 through 5 on the front face of the diagram. Horizontal lines indicate the precise location for each measurement.

1.	2.	3.	4.	5.
----	----	----	----	----
 - b. A geologist would take strike and dip measurements at convenient outcrops on the surface. Take dip measurements along the front of the block diagram, as close to the surface as possible. Put the appropriate strike and dip symbols in the six white ovals along the top of the diagram, and write each dip measurement in the appropriate spot.
 - c. Draw dashed axial traces for the three folds not cut by a fault. Put them along both the vertical and horizontal surface, and include the appropriate symbol from Figure 14.4.
 - d. What type of fault is illustrated? Be sure the correct map symbol is used to indicate dip. Put arrows on the vertical surface and map symbols on the horizontal surface to indicate the relative sense of motion across the fault.
4. Partially completed block diagrams are shown in Figure 14.13. Using the information provided for each diagram, fill in the blank faces on the blocks and answer the questions.
- a. The vertical column on the front face of Figure 14.13A shows the different rock units encountered in an old oil well.
 - (1) Use the available information to help you complete the diagram.
 - (2) What kind of fold is this (anticline, syncline; upright, inclined, overturned, or recumbent; plunging or non-plunging)?
 - (3) Illustrate the position of the axial surface of the fold by sketching its trace on the top and end of the block. (the trace is the imaginary line formed where the axial surface intersects another surface).

Answer Key For Historical Geology

**William Clement Putnam, Robert
Wallace Webb**

Answer Key For Historical Geology:

Manual for Historical Geology Percival Robertson, 1959

Exercises in Historical Geology John Paul Brand, 1963

Laboratory Exercises in Physical Geology William Clement Putnam, Robert Wallace Webb, 1945 **The Earth**

Through Time Harold L. Levin, David T. King, Jr., 2016-06-21 The Earth Through Time 11th Edition by Harold L Levin and David T King chronicles the Earth's story from the time the Sun began to radiate its light to the beginning of civilization The goal of The Earth Through Time is to present the history of the Earth and the science behind that history as simply and clearly as possible The authors strived to make the narrative more engaging to convey the unique perspective and value of historical geology and to improve the presentation so as to stimulate interest and enhance the reader's ability to retain essential concepts long after the final exam **Historical Geology** Reed Wicander, James Stewart Monroe, 2000

HISTORICAL GEOLOGY EVOLUTION OF EARTH AND LIFE THROUGH TIME THIRD EDITION teaches students the basic principles of the physical and biological events of Earth's history as well as how scientists apply these principles to unravel the history of Earth Authors Wicander and Monroe present a balanced overview of both the geological and biological history of the Earth as a continuum of interrelated events These events reflect the underlying principles and processes that have shaped our planet The authors also explain the historical development of these basic principles and processes and their importance in deciphering the history of Earth Three major themes time evolutionary theory and plate tectonics are woven throughout the book These themes help readers link what may seem like unrelated material and are essential for understanding historical geology Included with every new copy of this edition is In TERRA Active™ 2.0 CD-ROM
