

Activity 1.4.5 Dimensioning Answer Key

Introduction

Dimensions are as important as the shapes that you sketch. In order to accurately reproduce a part, the manufacturer must know the proper size and the proper location for all features. This includes the overall height, width, and depth of an object, as well as the size and location of all other features.

There are dozens of rules and guidelines associated with dimensioning. You will learn how to apply just eight of these in order to make your sketches easy for anyone to understand.

Equipment

- PLTW Gateway notebook
- Pencil
- Eraser
- Straight edge

Procedure

In this activity you will begin by following along as your teacher presents information on dimensioning. Then you will apply your knowledge of dimensioning to identify missing dimensions on orthographic drawings. Last, you will practice sketching and dimensioning in orthographic from an isometric sketch. Make sure to follow the dimensioning guidelines.

1. Why is it necessary to dimension a sketch?

To communicate size and location of every feature.

2. What dimensions are needed to fully describe a sketch?

Size and Location
