

Section 3-1 Mendel's Work ANSWER KEY

1. In the cross above stem height or stem length is being studied.
2. The two alleles are tall stems and short stems.
3. The dominant allele is tall stems because the trait always shows up when the allele is present.
4. The recessive allele is short stems., because it is masked, or covered up, by the allele for tall stems.
5. The F₁ offspring have one allele for tall stems and one allele for short stems. They received the allele for tall stems from the tall parent and the allele for short stems from the short parent.

Doing Integrated History and Philosophy of Science: A Case Study of the Origin of Genetics Yafeng

Shan,2020-08-17 This book offers an integrated historical and philosophical examination of the origin of genetics The author contends that an integrated HPS analysis helps us to have a better understanding of the history of genetics and sheds light on some general issues in the philosophy of science This book consists of three parts It begins with historical problems revisiting the significance of the work of Mendel de Vries and Weldon Then it turns to integrated HPS problems developing an exemplar based analysis of the development and the progress in early genetics Finally it discusses philosophical problems conceptual change evidence and theory choice Part I lays out a new historiography serving as a basis for the discussions in part II and part III Part II introduces a new integrated HPS method to analyse and interpret the historiography in Part I and to re examine the philosophical issues in Part III Part III develops new philosophical accounts which will in turn make a better sense of the history of scientific practice more generally This book provides a practical defence of integrated HPS the best way to defend integrated HPS is to do it
