### SECTION 1. THE LINNAEAN SYSTEM OF CLASSIFICATION

1. organisms or species
2. physical similarities
3. taxa
4. organisms or species
5. binomial nomenclature
6. a scientific name or two-part Latin name
7. In a hierarchy, each level is nested, or included, in the level above it.
8. From kingdom to species, the taxa become more and more specific, broad to specific. **Seven taxa:** a. kingdom, b. phylum, c. class, d. order, e. family, f. genus, g. species
9. The technology at the time did not allow Linnaeus to examine organisms at the molecular or genetic level.
10. Unrelated species can evolve similar traits through convergent evolution.
11. These types of similarities are more likely the result of species sharing a common ancestor than are physical similarities.
12. naming, classifying
13. Latin
14. genus, species

### SECTION 2. CLASSIFICATION BASED ON EVOLUTIONARY RELATIONSHIPS

1. the evolutionary history for a group of species

4. taxon being classified
5. clade
6. node
7. derived characters
8. a group of organisms that shares a common ancestor
9. Scientists must determine which derived characters are shared by which groups of organisms; the more derived characters a

10. A node is a place where a branch splits. It represents the most common ancestor shared by a clade.
11. DNA sequences/genes, amino acid sequences/proteins, hormones, etc.
12. As more research is done and the evolutionary histories of different species become better understood, evolutionary trees are rearranged to reflect the most current scientific understanding.
13. The species are very closely related, they share a relatively recent common ancestor.
14. A phylogeny shows the origins for a group, or "clade," of species.
15. Cladistics is classification based on evolutionary relationships and a cladogram shows these relationships in a branching-tree diagram.
16. derived

### SECTION 4. DOMAINS AND KINGDOMS

1. Since it reflects the most current understanding of how living things are related, new discoveries can change the way living things are classified.
2. Three hundred years ago, only two kingdoms were recognized. Now, a six-kingdom system is most widely accepted.
3. His research revealed two genetically different groups of prokaryotes, which justified splitting kingdom Monera into two kingdoms. The genetic and cellular differences were so great, that these two kingdoms were eventually placed into different domains in the current three-domain system.

#### Timeline:

1753: Linnaeus introduced his two-kingdom system which included Plantae and Animalia; 1866: Kingdom Protista introduced by Haeckel; 1938: Kingdom Monera introduced by Copeland; 1959:

Accounting Principles, Parts 1 and 2, Study Guide Jerry J. Weygandt, Donald E. Kieso, Paul D. Kimmel, Barbara Trenholm, 2004-03-09 The Navigator is a learning system designed to guide students through each chapter and consists of a series of checklists tied to the chapter's study aids, text features, and study skills. A Learning Styles Model is introduced in the preface and incorporated throughout the book to enable students with different learning approaches to better understand the material. Feature Stories are brief stories of real Canadian companies that relate the chapter information to the real world and are discussed further throughout the chapter. Chapter Previews at the beginning of each chapter feature a paragraph linking the opening vignette to chapter material. A visual outline of the topics and subtopics of the chapter is also presented to provide students with a chapter roadmap. The text has been thoroughly reviewed by an instructor of English as a Second Language in manuscript stage to ensure that Accounting Principles provides an unprecedented level of clarity and readability to all readers. Accounting Equation Analyses appear in the margins next to key journal entries. They help your students understand the impact of accounting transactions and cash flow on the financial statements. Stepped out pedagogy breaks down complex topics making the material more manageable for students. Some examples of this pedagogy are Concepts for Review. Concepts learned in previous chapters that are essential in order to understand the topics about to be covered are listed at the start of each chapter with page references. Before You Go On These Review it and Do It sections ensure that students understand what has just been covered before progressing further into the chapter. *Study Guide [to]* *Microbiology, Principles & Applications, Third Edition [by] Jacquelyn G.
