

## 8. Windows Movie Maker 2.6

Digital video editing has become increasingly popular in recent years. For this purpose *Windows Vista* is equipped with the program *Windows Movie Maker*.

You can use this program to edit the videos on your hard disk as well as the footage you have on your digital video camera. You can use this program to rearrange your rough clips in the order you prefer and trim the clips to the right size. You can also add titles, transitions, effects, narrations and music to the movie.

When you have finished editing the movie, you can save the result to the hard disk of your computer. This is called *publishing* the movie.

You can use *Windows DVD Maker* to burn your movie to DVD, so you can play it in your regular DVD player and watch it on television. *Windows DVD Maker* is not available in *Windows Vista Home Basic*. Unfortunately, *Windows DVD Maker* most likely does not function on computers with video cards that are unable to display the regular version of *Windows Movie Maker*.

In this chapter you learn the following:

- open *Windows Movie Maker*;
- import video files, photos and music;
- edit a movie;
- split and trim video clips;
- add transitions, effects and titles;
- add music and a narration;
- play a movie;
- publish a movie.

### **Please note:**

In this chapter the sample videos that come packaged with *Windows Vista* are used. If you do not have these files on the hard disk of your computer, you can copy the files from the CD-ROM you received with this book. In **Appendix A** at the end of this book you can read how to do that.
