## **Advanced Level Geography Paper 2 June 2013:**

**The Unions' Response to Globalization** Gary Chaison, 2014-07-08 Globalization is commonly described in trade and cultural terms but its impact on unions and collective bargaining is seldom assessed. The few studies of unions and globalization are mostly collections of cases studies of how unions can work together or with other alliance partners to defend against the power of multinational corporations. This book goes beyond the current research by asking how unions have tried to deal with globalization and how globalization might threaten the fundamental union mission of taking wages, hours and conditions of employment out of competition. The introductory chapter defines globalization and uses the case of the Detroit Three automakers GM, Chrysler and Ford to show how globalization can affect employment and union size, influence and relevancy. The second chapter shows how unions deal with globalization through collective bargaining regarding outsourcing, alliances, strikes and political action including lobbying and international work standards. The final chapter argues that the unions cannot continue unchanged in this age of globalization and asks what they must do to be effective and relevant.

*Debates in Geography Education* Mark Jones, David Lambert, 2017-09-07 *Debates in Geography Education* encourages early career teachers, experienced teachers and teacher educators to engage with and reflect on key issues, concepts and debates. It aims to enable readers to reach their own informed judgements with deeper theoretical knowledge and understanding. The second edition is fully updated in light of the latest research, policy and practice in the field as well as key changes to the curriculum and examination specifications. Expert contributors provide a range of perspectives on international, historical and policy contexts in order to deepen our understanding of significant debates in geography education. Key debates include geography's identity as an academic discipline, what constitutes knowledge in geography, places and regional geography, what it means to think geographically, constructing the curriculum, how we link assessment to making progress in geography, the contribution of fieldwork and outdoor experiences, technology and the use of Geographical Information Systems, school geography and employability, understanding the gap between school and university geography, evidence-based practice and research in geography education. The comprehensive, rigorous coverage of these key issues together with carefully annotated selected further reading will help support and shape further research and writing. *Debates in Geography Education* is a key resource that is essential reading for all teachers and researchers who wish to extend their grasp of the place of geography in education. Mark Jones is Senior Lecturer in Education at the University of the West of England, Bristol, UK. David Lambert is Professor of Geography Education at UCL Institute of Education, London, UK.

**Bihar and Mithila** J. Albert Rorabacher, 2016-09-13 The world has become obsessed with the Western notions of progress, development and globalization, the latter a form of human and economic homogenization. These processes, through the aegis of the United Nations, are comparatively monitored. Those nations deemed to be lagging behind are then provided with foreign aid and developmental assistance. For nearly seventy years, India has

sought its place in this global endeavour yet even today abject poverty and backwardness can be observed in districts in almost every state with the highest concentration of such districts found in the state of Bihar and a cultural enclave known as Mithila Development in India has been elusive because it is difficult to define and because the Western concepts of development and progress have no absolute equivalents within many non Western settings As a consequence development programmes often fail because they are unable to ask the right questions but equally important is the political economy derived from foreign aid For politicians there is no long term benefit to be derived from successful development In general foreign aid only serves to corrupt governments and politicians and in the end does very little for those who need help The struggling states of Bihar and Mithila serve as extreme examples of India s problems Development here has been thwarted by a hereditary landed aristocracy supported by religion casteism custom social stratification tradition and patterns of behaviour that can be traced back millennia In turn all these have been masterfully manipulated by co opted politicians who have turned politics into a veritable art form as this volume comprehensively demonstrates

*Chinese Politics as Fragmented Authoritarianism* Kjeld Erik Brødsgaard, 2016-10-04 This book explores how far the concept of fragmented authoritarianism remains valid as the key concept for understanding how the Chinese political process works It contrasts fragmented authoritarianism which places bureaucratic bargaining at the centre of policy making arguing that the goals and interests of the implementing agencies have to be incorporated into a policy if implementation is to be secured

with other characterisations of China's political process Individual chapters consider fragmented authoritarianism at work in a range of key policy areas including energy issues climate change and environmental management financial reform and civil military relations The book also explores policy making at the national provincial city and local levels debates how far the model of fragmented authoritarianism is valid in its current form or whether modifications are needed and discusses whether the system of policy making and implementation is overcomplicated unwieldy and ineffective or whether it is constructive in enabling widespread consultation and scope for imagination flexibility and variation

**A University Education** David Willetts, 2017-11-17 Universities have a crucial role in the modern world In England entrance to universities is by nation wide competition which means English universities have an exceptional influence on schools a striking theme of the book This important book first investigates the university as an institution and then tracks the individual on their journey to and through university In *A University Education* David Willetts presents a compelling case for the ongoing importance of the university both as one of the great institutions of modern society and as a transformational experience for the individual The book also makes illuminating comparisons with higher education in other countries especially the US and Germany Drawing on his experience as UK Minister for Universities and Science from 2010 to 2014 the author offers a powerful account of the value of higher education and the case for more expansion He covers controversial issues in which he was involved from access for disadvantaged students to the introduction of 9 000 fees The final section addresses some of the big questions for the future such as the the relationship between universities and business especially in promoting innovation He argues that the two great contemporary trends of globalisation and technological innovation will both change the university significantly This is an authoritative account of English universities setting them for the first time in their new legal and regulatory framework
