

Ecological Sustainability And Integrity Concepts And Approaches

Neil H. Kessler

Ecological Sustainability And Integrity Concepts And Approaches:

Ecological Sustainability and Integrity: Concepts and Approaches J. Lemons, L. Westra, Robert

Goodland, 1997-12-31 This book follows upon earlier work which culminated in the publication of two recent books Sustainable Development Science Ethics and Public Policy John Lemons and Donald A Brown editors and Perspectives on Ecological Integrity Laura Westra and John Lemons editors Both of these books also were published by Kluwer Academic Publishers In this book we seek to explore more fully the concepts of sustainability and ecological integrity as well as the connections between them We have divided chapters into three groups In the first the concept of sustainability in relation to science law and ethics is explored In the second concepts of sustainability and ecological integrity are applied to problems in specific natural resources Finally in the third group we examine possible approaches to public policy which might include concepts of sustainability and ecological integrity Overall we believe that this collection presents a wide variety of perspectives discussions and case studies John Lemons Laura Westra Robert Goodland Editors ix CONTENTS PART I

Sustainability in Relation to Science Law and Ethics Chapter 1 The Concept of Sustainability A Critical Approach Lynton K Caldwell 1 Problems of Definition 2 Behavioral Obstacles 4 Psychological Obstacles Seven Deadly Sins of Unsustainability 8 4 Ontology and Closeness in Human-Nature Relationships Neil H. Kessler, 2018-10-10 In Ontology and Closeness in Human Nature Relationships Neil H Kessler identifies the preconceptions which can keep the modern human mind in the dark about what is happening relationally between humans and the more than human world He has written an accessible work of environmental philosophy with a focus on the ontology of human nature relationships In it he contends that large scale environmental problems are intimate and relational in origin He also challenges the deeply embedded modernist assumptions about the relational limitations of more than human beings ones which place erroneous limitations on the possibilities for human more than human closeness Diverging from the posthumanist literature and its frequent reliance on new materialist ontology the arguments in the book attempt to sweep away what ecofeminists call human nature dualisms In doing so conceptual avenues open up that have the power to radically alter how we engage in our daily interactions with the more than human world all around us Given the diversity of fields and disciplines focused on the human nature relationship the topics of this book vary quite broadly but always converge at the nexus of what is possible between humans and more than human beings The discussion interweaves the influence of human nature dualisms with the limitations of Deleuzian becoming and posthumanism s new materialism and agential realism It leverages interhuman interdependence theory Charles Peirce s synechism of feeling and various treatments of Theory of Mind while exploring the influence of human nature dualisms on sustainability place attachment common worlds pedagogy emergence and critical animal studies It also explores the implications of plant electrical activity plant intelligence and plant neurobiology for possibilities of relational capacities in plants while even grappling with theories of animism to challenge the animate inanimate divide The result is an

engaging novel treatment of human nature relational ontology that will encourage the reader to look at the world in a whole new way **A Systems Approach to the Environmental Analysis of Pollution Minimization** Sven E.

Jorgensen,2020-01-29 The environmental analysis of pollution problems always involves the use of mass and energy balances to quantify the extent of pollution and its sources This same form of analysis can be applied to ecosystems production systems a whole country or a region A Systems Approach to the Environmental Analysis of Pollution Minimization identifies and describes the common factors shared by these systems The book is organized in twelve chapters and progresses from general concepts to specific assessment methods Chapter one is a general introduction to environmental management principles Chapter two discusses conservation principles and their applications to environmental health Chapters three and four explore ecosystem health properties and analysis Chapters five through eleven present different methods of analysis including Green Accounting Clean Technology Life Cycle Analysis and Risk Assessment Editor Sven Jorgensen closes the book with a sweeping summary Jorgensen is a internationally published authority on the use and analysis of ecosystem models His new book is a comprehensive guide for both students and professionals A Systems Approach to the Environmental Analysis of Pollution Minimization is an invaluable contribution Features **The Oxford Companion to Global Change**

David J. Cuff,2008 In recent years global change has become increasingly important in technological ecological and political spheres This companion examines the environmental events of recent times and investigates long term trends as well as broader issues of global change **Research Handbook on Fundamental Concepts of Environmental Law** Douglas Fisher,2022-11-25 This expanded and updated Research Handbook delivers an authoritative and in depth guide to the conceptual foundations of environmental law It offers a nuanced reflection on the underlying principles by exploring issues such as human rights constitutional rights sustainable development and environmental impact assessment within the context of environmental law **Towards Principled Oceans Governance** Donald R. Rothwell,David L. VanderZwaag,2006-09-27

The sea change towards principled oceans governance Donald R Rothwell and David L VanderZwaag Beyond the buzzwords a perspective on integrated coastal and ocean management in Canada Aldo Chircop and Larry Hildebrand Operationalizing integrated coastal and oceans management in Australia the challenges Veronica Sakell The application of compliance and enforcement strategies on Canada s Pacific coast Francois Bilet Janna Cumming and Ted L McDorman Integrated maritime enforcement and compliance in Australia Sam Bateman et al Canada and the precautionary principle approach in ocean and coastal management wading and wandering in tricky currents David L VanderZwaag Susanna D Fuller and Ransom A Myers Australia and the precautionary principle moving from international principles to domestic and local implementation Lorne K Kriwoken Liza D Fallon and Donald R Rothwell Marine ecosystem management is the whole greater than the sum of the parts Bruce G Hatcher and Roger H Bradbury Ecosystem bill of rights Richard J Beamish and Chrys Ellen M Neville Community involvement in marine and coastal management in Australia and Canada Marian Binkley et al Aboriginal title and oceans

policy in Canada Dianna Ginn Canada's seas and her first nations a colonial paradigm revisited Russ Jones Indigenous rights in the sea the law and practice of native title in Australia Geoff Clark Aboriginal peoples and ocean policy in Australia an indigenous perspective Rodney Dillon The challenge of international oceans governance institutional ethical and conceptual dilemmas Douglas M Johnston

OUR FRAGILE WORLD: Challenges and Opportunities for Sustainable Development - Volume II M. K. Tolba, 2001-08-23 This publication Our Fragile World Challenges and Opportunities for Sustainable Development presents perspectives of several important subjects that are covered in greater detail and depth in the Encyclopedia of Life Support Systems EOLSS The contributions to the two volumes provide an integrated presentation of knowledge and worldviews related to the state of Earth's natural resources social resources institutional resources and economic and financial resources They present the vision and thinking of over 200 authors in support of efforts to solve the complex problems connected with sustainable development and to secure perennial life support on The Blue Planet These contributions are holistic informative forward looking and will be of interest to a broad readership This volume presents contributions with focus on the Economic and Institutional Dimensions of Sustainable Development in two sections KNOWLEDGE TECHNOLOGY AND MANAGEMENT Knowledge Technology and Management Economics Finance and trade POLICY AND INSTITUTIONAL IMPLICATIONS FOR SUSTAINABLE DEVELOPMENT Policy Issues Institutional implications Regional Analysis

Environment and Planning. C, Government & Policy, 2008 **Human Value, Environmental Ethics and Sustainability** Mark Ryan, 2016-10-03 It is widely acknowledged that we have a duty to protect the environment Yet current environmental policy discussions demonstrate that fulfilling this in practice is a difficult complex and costly task There are many ethical questions arising from such discussions Should we care about the environment because it is economically valuable or because nature has intrinsic value How do we establish an ethical trade off between our current needs and those of future generations Should we protect individual species or entire ecosystems instead What way should we discuss societal values and ideals or should scientific analysis take precedence within decision making practice This book aims to tackle some of these thorny sustainability issues and responds to them with a cohesive original alternative in the form of the precautionary ecosystem health principle PEHP It provides a detailed philosophical approach and advocates that a PEHP approach is able to overcome many of these stark and challenging difficulties within sustainability theory and environmental policy

Conceptions of Value in Environmental Decision-making John O'Neill, Clive L. Spash, Concerted Action on Environmental Valuation in Europe, 2000 This policy briefing series communicates the findings from nine workshops and three plenary meetings under the EVE programme These showed the diversity of research currently being undertaken in the area of environmental values and their policy expression The type of information relevant to the decision process extends from ecological functioning to moral values

Environment and Planning, 2008 Publishes interdisciplinary research on issues of Government and Policy with an international perspective Committed to a broad range

of policy questions not just those related to government and public policy Topics covered include nonstate agents private public collaboration and NGOs nongovernmental organisations All areas of economic social and environmental institutions and policy are included Disciplines from which papers are derived include political science planning geography economics law sociology and public administration

Environmental Challenges to Business Joel Reichart, Patricia Hogue Werhane, 2000

The Earthscan Reader in Environmental Values Linda Kalof, Terre Satterfield, 2005 First Published in 2005 Routledge is an imprint of Taylor Francis an informa company

Conceptualising and Responding to Complexity Giuseppe Munda, 2000 This policy briefing series communicates the findings from nine workshops and three plenary meetings under the EVE programme These showed the diversity of research currently being undertaken in the area of environmental values and their policy expression The type of information relevant to the decision process extends from ecological functioning to moral values

Sustainability in Question Jörg Köhn, 1999 This book explores approaches to sustainability by linking the economy society and the environment The international group of experts uses concepts of sustainability from the physical and social sciences to develop a framework for creating policies for sustainability Sustainability in Question goes beyond much of the existing literature on sustainability taking into account culture institutions knowledge and traditions It sheds new light on the ability of humans to create institutional and social arrangements which are able to adapt to changing conditions The authors consider the current state of environmental and institutional sustainability within the context of economic activity and public policy They recognise that some of the basic economic notions such as universal substitutability methodological individualism and the superiority of the price mechanism may be misplaced in the case of environmental protection Sustainability in Question will be welcomed by those interested in environmental economics science management and environmental studies as well as by those working in the fields of ecological economics natural resource economics and environmental sociology

Institutions and the Environment Arild Vatn, 2005 Developing an institutional response to the core issues raised in environmental policy making this text develops a distinct understanding of the role of institutions in environmental issues

Journal of Geoscience Education, 2009

Cost-benefit Analysis of Climate Change Paul Baer, Clive L. Spash, 2007

Journal of Planning Literature, 2004

Collected Essays on the Economics of Coral Reefs Herman S. J. Cesar, 2000 Corals and coral reefs are seriously degraded in most tropical seas Most of the damage is due to over exploitation and the use of destructive fishing methods This collection of essays presents a number of case studies on the economic analysis of coral reefs
