| <b>String Class</b>                                          |                                                                                                                                                                                                                                                                    |
| <code>String(String str)</code>                              | Constructs a new <code>String</code> object that represents the same sequence of characters as <code>str</code>                                                                                                                                                    |
| <code>int length()</code>                                    | Returns the number of characters in a <code>String</code> object                                                                                                                                                                                                   |
| <code>String substring(int from, int to)</code>              | Returns the substring beginning at index <code>from</code> and ending at index <code>to - 1</code>                                                                                                                                                                 |
| <code>String substring(int from)</code>                      | Returns <code>substring(from, length())</code>                                                                                                                                                                                                                     |
| <code>int indexOf(String str)</code>                         | Returns the index of the first occurrence of <code>str</code> ; returns <code>-1</code> if not found                                                                                                                                                               |
| <code>boolean equals(String other)</code>                    | Returns <code>true</code> if this is equal to <code>other</code> ; returns <code>false</code> otherwise                                                                                                                                                            |
| <code>int compareTo(String other)</code>                     | Returns a value <code>&lt;0</code> if this is less than <code>other</code> ; returns zero if this is equal to <code>other</code> ; returns a value <code>&gt;0</code> if this is greater than <code>other</code>                                                   |
| <b>Integer Class</b>                                         |                                                                                                                                                                                                                                                                    |
| <code>Integer(int value)</code>                              | Constructs a new <code>Integer</code> object that represents the specified <code>int</code> value                                                                                                                                                                  |
| <code>Integer.MIN_VALUE</code>                               | The minimum value represented by an <code>int</code> or <code>Integer</code>                                                                                                                                                                                       |
| <code>Integer.MAX_VALUE</code>                               | The maximum value represented by an <code>int</code> or <code>Integer</code>                                                                                                                                                                                       |
| <code>int intValue()</code>                                  | Returns the value of this <code>Integer</code> as an <code>int</code>                                                                                                                                                                                              |
| <b>Double Class</b>                                          |                                                                                                                                                                                                                                                                    |
| <code>Double(double value)</code>                            | Constructs a new <code>Double</code> object that represents the specified <code>double</code> value                                                                                                                                                                |
| <code>double doubleValue()</code>                            | Returns the value of this <code>Double</code> as a <code>double</code>                                                                                                                                                                                             |
| <b>Math Class</b>                                            |                                                                                                                                                                                                                                                                    |
| <code>static int abs(int x)</code>                           | Returns the absolute value of an <code>int</code> value                                                                                                                                                                                                            |
| <code>static double abs(double x)</code>                     | Returns the absolute value of a <code>double</code> value                                                                                                                                                                                                          |
| <code>static double pow(double base, double exponent)</code> | Returns the value of the first parameter raised to the power of the second parameter                                                                                                                                                                               |
| <code>static double sqrt(double x)</code>                    | Returns the positive square root of a <code>double</code> value                                                                                                                                                                                                    |
| <code>static double random()</code>                          | Returns a <code>double</code> value greater than or equal to <code>0.0</code> and less than <code>1.0</code>                                                                                                                                                       |
| <b>ArrayList Class</b>                                       |                                                                                                                                                                                                                                                                    |
| <code>int size()</code>                                      | Returns the number of elements in the list                                                                                                                                                                                                                         |
| <code>boolean add(E obj)</code>                              | Appends <code>obj</code> to end of list; returns <code>true</code>                                                                                                                                                                                                 |
| <code>void add(int index, E obj)</code>                      | Inserts <code>obj</code> at position <code>index</code> ( <code>0 &lt;= index &lt;= size</code> ); moving elements at position <code>index</code> and higher to the right (adds 1 to their indices) and adds 1 to <code>size</code>                                |
| <code>E get(int index)</code>                                | Returns the element at position <code>index</code> in the list                                                                                                                                                                                                     |
| <code>E set(int index, E obj)</code>                         | Replaces the element at position <code>index</code> with <code>obj</code> ; returns the element formerly at position <code>index</code>                                                                                                                            |
| <code>E remove(int index)</code>                             | Removes element from position <code>index</code> ; moving elements at position <code>index + 1</code> and higher to the left (subtracts 1 from their indices) and subtracts 1 from <code>size</code> ; returns the element formerly at position <code>index</code> |
| <b>Object Class</b>                                          |                                                                                                                                                                                                                                                                    |
| <code>boolean equals(Object other)</code>                    |                                                                                                                                                                                                                                                                    |
| <code>String toString()</code>                               |                                                                                                                                                                                                                                                                    |
