**Just Security in an Undergoverned World** William Durch, Joris Larik, Richard Ponzio, 2018-01-19 Just Security in an Undergoverned World examines how humankind can manage global problems to achieve both security and justice in an age of antithesis Global connectivity is increasing visibly and invisibly in trade finance culture and information helping to spur economic growth technological advance and greater understanding and freedom but global disconnects are growing as well Ubiquitous electronics rely on high value minerals scraped from the earth by miners kept poor by corruption and war People abandon burning states for the often indifferent welcome of wealthier lands whose people in turn draw into themselves Humanity's very success underwritten in large part by lighting up gigatons of long buried carbon for 200 years now threatens humanity's future The global governance institutions established after World War II to manage global threats especially the twin scourges of war and poverty have expanded in reach and impact while paradoxically losing the political support of some of their wealthiest and most powerful members Their problems mimic those of their members in struggling to adapt to new problems and maintain trust in norms and public bodies This volume argues however that a properly mandated managed and modernized global architecture offers unparalleled potential to midwife solutions to intractable issues from violent conflict and climate change to poverty and pandemic disease that transcend borders and the capacities of individual actors It offers just security as a new framework for charting innovating solutions and strategies for effective and essential global governance
