Among The Wild Chimpanzees Answers:

The Question of Animal Culture Kevin N. Laland, Bennett G. Galef, 2009-02-16 Fifty years ago a troop of Japanese macaques was observed washing sandy sweet potatoes in a stream sending ripples through the fields of ethology comparative psychology and cultural anthropology The issue of animal culture has been hotly debated ever since Now Kevin Laland and Bennett Galef have gathered key voices in the often rancorous debate to summarize the views along the continuum from Culture Of course to Culture Of course not The result is essential reading for anyone interested in the validity of animal culture and what it might say about our own The Evolution of Language W. Tecumseh Fitch, 2010-04-01 Language more than anything else is what makes us human It appears that no communication system of equivalent power exists elsewhere in the animal kingdom Any normal human child will learn a language based on rather sparse data in the surrounding world while even the brightest chimpanzee exposed to the same environment will not Why not How and why did language evolve in our species and not in others Since Darwin s theory of evolution questions about the origin of language have generated a rapidly growing scientific literature stretched across a number of disciplines much of it directed at specialist audiences The diversity of perspectives from linguistics anthropology speech science genetics neuroscience and evolutionary biology can be bewildering Tecumseh Fitch cuts through this vast literature bringing together its most important insights to explore one of the biggest unsolved puzzles of human history McGraw Hill 10 ACT Practice Tests, Seventh Edition Steven W.
