population management and public health

Politics in China is an authoritative introduction to how the world's second most populous nation and rapidly rising global power is governed today. Written by leading China scholars, each chapter offers an accessible overview of a key topic in Chinese politics. The opening section provides readers with a firm grounding in China's modern political history, covering the decline and fall of the last imperial dynasty and the rise to power of the Chinese Communist Party (CCP) and the radicalism of the era of Mao Zedong (1949-76), the dramatic economic reforms carried out by Deng Xiaoping and his disciples (1978 to 2012), and the era of Xi Jinping (2012 present) who has consolidated more personal power than any CCP leader since Mao. The next section sets the framework of politics in the People's Republic of China (PRC) with chapters on the ideology of the CCP, the structure and dynamics of the political system, the role of law and legal reform, and the policies behind the country's spectacular economic transformation. The book then shifts to a discussion of a series of major political issues in China today: reform and resistance in the countryside, changes and challenges in the cities, the arts and culture, the environment, and climate change, public health, population policy, and internet politics. The final chapters of the book cover politics in four important areas located on China's geographic periphery: Tibet, Xinjiang, Hong Kong, and Taiwan. The fourth edition of *Politics in China* has been thoroughly updated and includes a new chapter on the rise and rule of Xi Jinping. It is essential reading not only for students studying the PRC but also for any reader interested in learning how China has evolved in recent times, how its political system works, and about the most important challenges it faces in years ahead.

On October 1, 2009, the People's Republic of China (PRC) celebrated the 60th anniversary of its founding. And what an eventful and tumultuous six decades it had been. During that time, under the leadership of the Chinese Communist Party (CCP), China was transformed from one of the world's poorest countries into the world's fastest growing major economy and from a weak state barely able to govern or protect its own territory to a rising power that is challenging the United States for global influence. Over those same years, the PRC also experienced the most deadly famine in human history, caused largely by the actions and inactions of its political leaders. Not long after, there was a collapse of government authority that pushed the country to the brink of, and in some places actually into, civil war and anarchy. Today, China is for the most part peaceful, prospering, and proud. This is the China that was on display for the world to
