

Chapter 6: A Tour of the Cell

Concept 6.1 To study cells, biologists use microscopes and the tools of biochemistry

1. The study of cells has been limited by their small size, and so they were not seen and described until 1665, when Robert Hooke first looked at dead cells from an oak tree. His contemporary, Anton van Leeuwenhoek, crafted lenses, and with the improvements in optical aids, a new world was opened. *Magnification* and *resolving power* limit what can be seen. Explain the difference.
Magnification is the ratio of an object's image to its real size. In contrast, resolution measures the clarity of the image. How clear the picture is ~ accuracy in visualization
versus
How accurate the picture is ~ to scale? y = N
2. The development of electron microscopes has further opened our window on the cell and its organelles. What is considered a major disadvantage of the electron microscopes?

A major disadvantage of the electron microscopes is their inability to reflect color

3. Study the electron micrographs in your text. Describe the different types of images obtained from:
scanning electron microscopy (SEM)
The SEM provides good 3-D images which is good for getting a good depth perception, - used for detailed studies
transmission electron microscopy (TEM)
2-D imaging that is used/beneficial for achieving extreme detail where you're able to compare well since you can enhance contrast
4. In *cell fractionation*, whole cells are broken up in a blender, and this slurry is centrifuged several times. Each time, smaller and smaller cell parts are isolated. This will isolate different organelles and allow study of their biochemical activities. Which organelles are the smallest ones isolated in this procedure? *The ribosomes*

Concept 6.2 Eukaryotic cells have internal membranes that compartmentalize their functions

5. Which two domains consist of prokaryotic cells?

Bacteria and Archaea consist of prokaryotic cells
Euk: fungi, animals & plants

6. A major difference between prokaryotic and eukaryotic cells is the location of their DNA. Describe this difference.
The DNA of the eukaryotic cell is in the nucleus, versus in prokaryotic cells, the DNA is in the nucleoid (not membrane enclosed)

Ap Biology Chapter 5guided Reading:

Resources in Education, 1971-07 **Research in Education**, 1971-12 **Teaching Through Text** Michael C. McKenna, Richard David Robinson, 2002 *Teaching Through Text* provides a broad range of techniques to enhance students literacy development and learning across the curriculum. McKenna and Robinson focus on describing, illustrating and applying both teacher directed and student centered strategies. Student centered strategies are illustrated through graphic organizers, concept bridges and applicable exercises. **College Without High School** Blake Boles, 2009-09-01 *Because the real world is the best education*. High school can be boring. High school curriculum can be frustrating and out of touch. So what is the answer for young people whose creativity, bright ideas and boundless energy are being stifled in that over-scheduled and grade driven environment? What would you do if you could go to college without going to high school? Would you travel abroad, spend late nights writing a novel, volunteer in an emergency room or build your own company? What dreams would you be pursuing right now? *College Without High School* shows how independent teens can self design their high school education by becoming unschooled. Students begin by defining their goals and dreams and then pursue them through a combination of meaningful and engaging adventures. It is possible to pursue your dreams and gain admission to any college of your choice. Boles shows how to fulfill college admission requirements by proving five preparatory results: intellectual, passion, leadership, logical reasoning, background knowledge and the capacity for structured learning. He then offers several suggestions for life changing, confidence building adventures that will demonstrate those results. This intriguing approach to following your dreams and doing college prep on your own terms will be welcomed by students and their parents.
